Radical Tectonics:

Radical Tectonics Annette W. LeCuyer, 2001 As a tendency toward formalism returns to architecture a number of practitioners are investigating the outer limits of tectonic expression Vanguard architects are extending the boundaries of conventional construction to respond specifically to programmatic and site requirements Capturing this dynamic work *Radical Tectonics* presents four practices whose buildings push poetic construction to new extremes All in their own way and according to local sensibility and conditions Gunther Behnisch Stuttgart Enric Miralles Barcelona Patkau Architects Vancouver and Mecanoo Delft focus on the art of construction and innovative craftsmanship From Behnisch's contextual awareness of particular social and political environments to Miralles's building as land form from Patkau's funky vernacular to Mecanoo's playful manipulation of program and landscape these studies confront architecture's very nature with vigor and provocation The work in *Radical Tectonics* champions the ingenuity of craft and the exploration of surface form and creative expression to set new benchmarks of spatial complexity for the twenty first century 4 X 4 a new series on contemporary international architecture Each title includes 4 concise architect profiles 16 influential projects a reference section

Introducing Architectural Tectonics Chad Schwartz, 2025-08-29 The second edition of *Introducing Architectural Tectonics* is an exploration of the poetics of construction Tectonic theory is an integrative philosophy examining the relationships formed between design construction and space while creating or experiencing a work of architecture In this text author Chad Schwartz presents an introductory investigation into tectonic theory subdividing it into distinct concepts in order to make it accessible to beginning and advanced students alike The book centers on the tectonic analysis of twenty contemporary works of architecture located in over a dozen countries across the globe Germany Italy Burkina Faso the United States Chile Japan Bangladesh Mexico Spain Australia and more and designed by notable architects such as Tadao Ando Herzog de Meuron Kengo Kuma Peter Zumthor Xu Tiantian and Francis K r Although similarities do exist between the projects their distinctly different characteristics and range of interpretations of tectonic expression provide the most significant lessons to help you learn about tectonic theory This second edition has been updated to include the tectonic analysis of four new architectural precedents From Nigeria the Makoko Floating School by NL From Burkina Faso Lyc e Schorge by K r Architecture From Mexico the Matamoros Public Market by Colectivo C733 From China Quarry 8 by DnA_Design and Architecture Written in clear accessible language these investigations examine the poetic potential of architecture presenting lessons and concepts that you can integrate into your own work whether studying in a university classroom or practicing in a professional office

The Post-Screen Through Virtual Reality, Holograms and Light Projections Jenna Ng, 2025-10-01 Screens are ubiquitous today Yet contemporary screen media eliminate the presence of the screen and diminish the visibility of its boundaries As the image becomes indistinguishable from the viewer's surroundings this unsettling prompts re examination of how screen boundaries demarcate Through readings of three media forms Virtual Reality holograms and light projections this book develops new theories of the surfaces on and spaces in which images are displayed Interrogating contemporary contestations of reality against illusion it argues that the disappearance of difference reflects shifted conditions of actuality and virtuality in understanding the human condition These shifts further connect to the current state of politics by way of their distorted truth values corrupted terms of information and internalizations of difference The Post Screen Through Virtual Reality Holograms and Light Projections thus thinks anew the image's borders and delineations evoking the screen boundary as an instrumentation of today's intense virtualizations which do not tell the truth In the process a new imagination for images emerges for a gluttony of the virtual for new conceptualizations of object and representation materiality and energies media and histories real and unreal for new understandings of appearances disappearance replacement and replacement the post screen

Urban Futures Tim Hall, Malcolm Miles, 2004-11-23 Urban Futures brings together commentaries from a wide range of contemporary disciplines and fields relevant to urban culture form and society The book concerns cities in the broadest sense not just as buildings and spaces but also as processes and events or sites of occupation in which meanings are constructed in many ways The contributors draw on their specialist areas of research to inform current debate but they also speculate as to how cities will be shaped in the 21st century Specific areas of research include homeless people's organisations and restoration ecology in brownfield sites in the USA post industrial urban landscapes post industrial economics tourism and cultural planning The book allows each writer to state their own conclusions but together they suggest that tomorrow's cities will while remaining locations of difference and contestation be rapidly evolving systems in which dwellers assume increasing responsibilities and power

Global Geomorphology Michael A. Summerfield, 2014-05-12 The plate tectonics revolution in the earth sciences has provided a valuable new framework for understanding long term landform development This innovative text provides a comprehensive introduction to the subject of global geomorphology with the emphasis placed on large scale processes and phenomena Integrating global tectonics into the study of landforms and incorporating planetary geomorphology as a major component the author discusses the impact of climatic change and the role of catastrophic events on landform genesis and includes a comprehensive study of surface geomorphic processes

Ecology S. C. Santra, 1994 In recent years much has been said and written about the science of Ecology at all levels in our educational system The study of Ecology occupies an important place in the science

curriculum if only because being concerned with all aspects of life it impinges closely on man himself The outstanding claim of Ecology as a branch of study is that it is concerned with living things as they really are occupying a diversity of places and responding to one another and their physical environment in a variety of complex ways In the present book Ecology Basic and Applied various biological and physical environmental aspects were considered within the ecological arena of study
