**Radio and Television Broadcasting in Eastern Europe** Burton Paulu, 1974 Dotyczy m in Polski **Radio and Television Broadcasting in Eastern Europe** Burton Paulu, **Popular Television in Eastern Europe During and Since Socialism** Anikó Imre, Timothy Havens, Kati Lustyik, 2013 This collection of essays responds to the recent surge of interest in popular television in Eastern Europe This is a region where television s transformation has been especially spectacular shifting from a state controlled broadcast system delivering national regional and heavily filtered Western programming to a deregulated multi platform transnational system delivering predominantly American and Western European entertainment programming Consequently the nations of Eastern Europe provide opportunities to examine the complex interactions among economic and funding systems regulatory policies globalization imperialism popular culture and cultural identity This collection will be the first volume to gather the best writing by scholars across and outside the region on socialist and postsocialist entertainment television as a medium technology and institution **Radio and Television Broadcasting on the European Continent** Burton Paulu, 1967-10-30 Radio and Television Broadcasting on the European Continent was first published in 1967 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions In this book Dr Paulu provides a comprehensive survey based on firsthand study of the development and current status of radio and television broadcasting in continental Europe He discusses the technical organizational financial and programming aspects of European broadcasting in both Communist and Western countries The material is organized not on a country by country basis but as it relates to broad basic issues and it is presented in a framework of such interrelated factors as geography history politics international relations religious traditions language national economic standards and cultural and social life The broadcasting systems studied include those of the Soviet Union and other Communist countries France West Germany Belgium the Netherlands Italy Sweden and Switzerland The account is particularly timely in view of the concern and discussion about the future course of broadcasting in the United States It has relevance not only for communications specialists but for political scientists and other scholars in the social sciences as well as for the growing public which is interested in the improvement of American broadcasting *Eastern Europe* Task Force on Telecommunications and Broadcasting in Eastern Europe, 1990 **Television and Radio in the United Kingdom** Burton Paulu, 1981 Central and Eastern European Media in Comparative Perspective John Downey, Sabina Mihelj, 2016-04-15 Appearing more than twenty years after the revolutions in Central and Eastern Europe this book could not have come at a more appropriate time a time to take stock not only of the changes but also the continuities in media systems of the region since 1989 To what extent are media institutions still controlled by political forces To what extent are media markets operating in Central and Eastern Europe Do media systems in Central and Eastern Europe resemble media systems in other parts of Europe The answers to

these questions are not the same for each country in the region Their experience is not homogeneous An international line up of distinguished experts and emerging scholars methodically examine the different economic political cultural and transnational factors affecting developments in media systems across Central and Eastern Europe Whereas earlier works in the media system tradition have in the main adopted the political framework of comparative politics the authors argue that media systems are also cultural and economic institutions and there are other critical variables that might explain certain outcomes better Topics discussed range from political economy to gender inequality to the study of ethno cultural diversity This unmatched volume gives you the unique opportunity to study the growing field of comparative media analysis across Eastern and Western Europe A valuable resource that goes beyond the field of media and cultural analysis which media scholars as well as to area specialists should not go without
