Minimization of Radioactive Waste from Nuclear Power

Plants and the Back End of the Nuclear Fuel Cycle International Atomic Energy Agency,1995 Waste management at the back end of the nuclear fuel cycle comprises the various activities involved in the handling of the spent fuel once it has left the reactor The purpose of the minimization of radioactive waste is threefold a to reduce the risks of radiation exposure of technical personnel as well as of the public b to reduce contamination of the environment and c to reduce overall costs by reducing the repository space required for final waste disposal Waste minimization has become a major part of waste management policies

Disposition of High-Level Waste and Spent Nuclear Fuel National Research Council,Division on Earth and Life Studies,Board on Radioactive Waste Management,Committee on Disposition of High-Level Radioactive Waste Through Geological Isolation,2001-07-05 Focused attention by world leaders is needed to address the substantial challenges posed by disposal of spent nuclear fuel from reactors and high level radioactive waste from processing such fuel The biggest challenges in achieving safe and secure storage and permanent waste disposal are societal although technical challenges remain Disposition of radioactive wastes in a deep geological repository is a sound approach as long as it progresses through a stepwise decision making process that takes advantage of technical advances public participation and international cooperation Written for concerned citizens as well as policymakers this book was sponsored by the U S Department of Energy U S Nuclear Regulatory Commission and waste management organizations in eight other countries
