Radio carbon: Calibration and Prehistory

Edited by
Trevor Watkins

The technical complexities of C-14 dating can baffle archaeologists.

This book attempts their rescue. It is by specialists for non-specialists.

The realisation that the production rate of C-14 in the atmosphere was not constant undermined the assumption that C-14 years could be equated with calendar years.

Correction by calibration with cross-dated tree-ring radio-carbon samples offers hope, but creates 'correction curves' of bewildering variety.

This book explains the issues clearly and simply, provides valuable comparative data, assesses the reliability of the methods, tells how to take a sample, and where to send it for dating.

Radiocarbon Calibration And Prehistory:

Radiocarbon Trevor Watkins,1975 **The Farming of Prehistoric Britain** P. J. Fowler,1983-07-07 Emphasizing past gains in knowledge from experimental aerial and field archaeology Dr Fowler demonstrates how the application of archaeological approaches to agrarian history has made the subject central to our understanding of the prehistoric period Emphasizing past gains in knowledge from experimental aerial and field archaeology Dr Fowler demonstrates how the application of archaeological approaches to agrarian history has made the subject central to our understanding of the prehistoric period The Prehistory of Texas Timothy K. Perttula,2012-09-24 Paleoindians first arrived in Texas more than eleven thousand years ago although relatively few sites of such early peoples have been discovered Texas has a substantial post Paleoindian record however and there are more than fifty thousand prehistoric archaeological sites identified across the state This comprehensive volume explores in detail the varied experience of native peoples who lived on this land in prehistoric times Chapters on each of the regions offer cutting edge research the culmination of years of work by dozens of the most knowledgeable experts Based on the archaeological record the discussion of the earliest inhabitants includes a reclassification of all known Paleoindian projectile point types and establishes a chronology for the various occupations The archaeological data from across the state of Texas also allow authors to trace technological changes over time the development of intensive fishing and shellfish collecting funerary customs and the belief systems they represented long term changes in settlement mobility and character landscape use and the eventual development of agricultural societies The studies bring the prehistory of Texas Indians all the way up through the Late Prehistoric period ca a d 700 1600 The extensively illustrated chapters are broadly cultural historical in nature but stay strongly focused on important current research problems Taken together they present careful and exhaustive considerations of the full archaeological and paleoenvironmental record of Texas *Time, Space, and Transition in Anasazi Prehistory* Michael S. Berry,1982 **Down the Bright Stream: The Prehistory of Woodcock Corner and the Tregurra Valley, Cornwall** Sean R. Taylor,2022-06-23 This volume reports on a series of fieldwork projects carried out in the Tregurra Valley to the east of Truro Cornwall between 2009 2015 The fieldwork led to the identification of a large number of pits and hearths across the site the majority of which that have proved dateable spanning the Early Neolithic to the end of the Early Bronze Age **Prehistoric Britain** Joshua Pollard,2008-06-23 Informed by the latest research and in depth analysis Prehistoric Britain provides students and scholars alike with a fascinating overview of the development of human societies in Britain from the Upper Paleolithic to the end of the Iron Age Offers readers an incisive synthesis and much needed overview of current research themes Includes essays from leading scholars and professionals who address the very latest trends in current research Explores the interpretive debates surrounding major transitions in British prehistory *Prehistoric Britain* Timothy Darvill,2010-07-02 Britain has been inhabited by humans for over half a million years during which time there were a great

many changes in lifestyles and in the surrounding landscape This book now in its second edition examines the development of human societies in Britain from earliest times to the Roman conquest of AD 43 as revealed by archaeological evidence Special attention is given to six themes which are traced through prehistory subsistence technology ritual trade society and population Prehistoric Britain begins by introducing the background to prehistoric studies in Britain presenting it in terms of the development of interest in the subject and the changes wrought by new techniques such as radiocarbon dating and new theories such as the emphasis on social archaeology The central sections trace the development of society from the hunter gatherer groups of the last Ice Age through the adoption of farming the introduction of metalworking and on to the rise of highly organized societies living on the fringes of the mighty Roman Empire in the 1st century AD Throughout emphasis is given to documenting and explaining changes within these prehistoric communities and to exploring the regional variations found in Britain In this way the wealth of evidence that can be seen in the countryside and in our museums is placed firmly in its proper context It concludes with a review of the effects of prehistoric communities on life today With over 120 illustrations this is a unique review of Britain's ancient past as revealed by modern archaeology The revisions and updates to Prehistoric Britain ensure that this will continue to be the most comprehensive and authoritative account of British prehistory for those students and interested readers studying the subject

Prehistoric Gold in Europe Giulio Morteani, Jeremy P. Northover, 2013-06-29 Interest in the study of early European cultures is growing These cultures have left us objects made of gold other metals and ceramics The advent of metal detectors coupled with improved analytical techniques has increased the number of findings of such objects enormously Gold was used for economic and ceremonial purposes and thus the gold objects are an important key to our understanding of the social and political structures as well as the technological achievements of Bronze and Iron Age European societies A correct interpretation of the information provided by gold and other metal objects requires the cooperation of experts in the fields of social materials and natural science Detailed investigation of gold deposits in Europe have revealed the composition and genesis of the deposits as sources of the metal In *Prehistoric Gold in Europe* a group of leading European geoscientists metallurgists and archaeologists discuss the techniques of gold mining and metallurgy the socioeconomic importance of gold as coinage and a symbol of wealth and status and as an indicator of religious habits as well as a mirror of trade and cultural relations mirrored by the distribution and types of gold objects in prehistoric times

Prehistoric Flint Mines in Europe Françoise Bostyn, Jacek Lech, Alan Saville, Dagmara H. Werra, 2023-11-09 This volume offers a review of major flint mines dating from the Neolithic to the Bronze Age The 18 articles were contributed by archaeologists from Belgium France Germany Great Britain Hungary Italy the Netherlands Poland Spain and Sweden using the same framework to propose a uniform view of the mining phenomenon

Climate and Cultural Change in Prehistoric Europe and the Near East Peter F. Biehl, Olivier P. Nieuwenhuyse, 2016-11-23 The subject of climate change could hardly be more timely In *Climate and Cultural Change in*

Prehistoric Europe and the Near East an interdisciplinary group of contributors examine climate change through the lens of new archaeological and paleo environmental data over the course of more than 10 000 years from the Near East to Europe Key climatic and other events are contextualized with cultural changes and transitions for which the authors discuss when how and if changes in climate and environment caused people to adapt move or perish More than this publication of crucial archaeological and paleo environmental data however the volume seeks to understand the social political and economic significance of climate change as it was manifested in various ways around the Old World Contrary to perceptions of threatening global warming in our popular media and in contrast to grim images of collapse presented in some archaeological discussions of past climate change this book rejects outright societal collapse as a likely outcome Yet this does not keep the authors from considering climate change as a potential factor in explaining culture change by adopting a critical stance with regard to the long standing practice of equating synchronicity with causality and explicitly considering alternative explanations

California Prehistory Terry L. Jones, Kathryn A. Klar, 2007-07-16 Some forty scholars examine California s prehistory and archaeology looking at marine and terrestrial palaeoenvironments initial human colonization linguistic prehistory early forms of exchange mitochondrial DNA studies and rock art This work is the most extensive study of California s prehistory undertaken in the past 20 years An essential resource for any scholar of California prehistory and archaeology

Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor s seminal book Radiocarbon Dating An Archaeological Perspective It covers the major advances and accomplishments of the 14C method in archaeology and analyzes factors that affect the accuracy and precision of 14C based age estimates In addition to reviewing the basic principles of the method it examines 14C dating anomalies and means to resolve them and considers the critical application of 14C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for 14C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record

The Drowning of a Cornish Prehistoric Landscape Andy M. Jones, Michael J. Allen, 2023-06-01 Between 2018 and 2019 Cornwall Archaeological Unit undertook two projects at Mount s Bay Penwith The first involved the excavation of a Bronze Age barrow and the second environmental augur core sampling in Marazion Marsh Both sites lie within an area of coastal hinterland which has been subject to incursions by rising sea levels Since the Mesolithic an area of approximately 1 kilometer in extent between the current shoreline and St Michael s Mount has been lost to gradually rising sea levels With current climate change this process is likely to occur at an increasing rate Given their proximity the opportunity was taken to draw the results from the two projects together along with all available existing environmental data from the area For the first time the results from all previous palaeoenvironmental projects in the Mount s Bay area have been brought together Evidence for coastal change and sea level rise is discussed and a model for the drowning landscape

presented In addition to modeling the loss of land and describing the environment over time social responses including the wider context of the Bronze Age barrow and later Bronze Age metalwork deposition in the Mount s Bay environs are considered The effects of the gradual loss of land are discussed in terms of how change is perceived its effects on community resilience and the construction of social memory and narratives of place The volume presents the potential for nationally significant environmental data to survive which demonstrates the long term effects of climate change and rising sea levels and peoples responses to these over time Modelling Human-Environment Interactions in and beyond Prehistoric Europe Samuel Seuru,Benjamin Albouy,2023-07-25 This book offers insight into the relationship between prehistoric and protohistoric human populations and the world around them It reconstructs key aspects of the palaeoenvironment from large scale drivers of environmental conditions such as climate to more regional variables such as vegetation cover and faunal communities The volume underscores how computational archaeology is leading the way in the study of past human environment interactions across spatial and chronological scales With the increased availability of high resolution climate models agent based modelling palaeoecological proxies and the mature use of Geographic Information System in ecological modelling archaeologists working in interdisciplinary settings are well positioned to explore the intersection of human systems and environmental affordances and constraints These methodological advancements provide a better understanding of the role humans played in past ecosystems both in terms of their impact upon the environment and in return the impact of environmental conditions on human systems They may also allow us to infer past ecological knowledge and land use patterns that are historically contingent rather than environmentally determined This volume gathers contributions that combine reconstructions of past environments and archeological data with a view to exploring their complex interactions at different scales and invites scholars from varying disciplines and backgrounds to present and compare different modelling approaches

The Dover Bronze Age Boat Peter Clark,2013-02-15 Tells the dramatic story of the discovery in 1992 of the perfectly preserved remains of a large prehistoric sewn plank boat in Dover a unique find of a boat capable of cross channel sailing It includes carefully researched reconstruction drawings **The Oxford Handbook of the Prehistoric Arctic** T. Max Friesen,Owen K. Mason,2016-08-05 The North American Arctic was one of the last regions on Earth to be settled by humans due to its extreme climate limited range of resources and remoteness from populated areas Despite these factors it holds a complex and lengthy history relating to Inuit I upiat Inuvialuit Yup ik and Aleut peoples and their ancestors The artifacts dwellings and food remains of these ancient peoples are remarkably well preserved due to cold temperatures and permafrost allowing archaeologists to reconstruct their lifeways with great accuracy Furthermore the combination of modern Elders traditional knowledge with the region s high resolution ethnographic record allows past peoples lives to be reconstructed to a level simply not possible elsewhere Combined these factors yield an archaeological record of global significance the Arctic provides ideal case studies relating to issues as diverse as the impacts of climate change on human societies the complex

process of interaction between indigenous peoples and Europeans and the dynamic relationships between environment economy social organization and ideology in hunter gatherer societies In the The Oxford Handbook of the Prehistoric Arctic each arctic cultural tradition is described in detail with up to date coverage of recent interpretations of all aspects of their lifeways Additional chapters cover broad themes applicable to the full range of arctic cultures such as trade stone tool technology ancient DNA research and the relationship between archaeology and modern arctic communities The resulting volume written by the region s leading researchers contains by far the most comprehensive coverage of arctic archaeology ever assembled *Benchmarks in Time and Culture* Joel F. Drinkard, Gerald L. Mattingly, James Maxwell Miller, 1988

World Prehistory and Archaeology Michael Chazan, 2021-04-30 World Prehistory and Archaeology provides an integrated discussion of world prehistory and archaeological methods presenting an up to date perspective on what we know about our human prehistory and how we come to know it A cornerstone of World Prehistory and Archaeology is the discussion of prehistory as an active process of discovery Methodological issues are addressed throughout the text to engage readers Archaeological methods are introduced following which the question of how we know the past is discussed This fifth edition involves readers in the current state of archaeological research revealing how archaeologists work and interpret what they find Through the coverage of various new research author Michael Chazan shows that archaeology is truly a global discipline In this edition there is a particular emphasis on the relevance of archaeology to contemporary society and to the major issues that face us today This edition will provide students with a necessary grounding in the fundamentals of archaeology before engaging them with the work that goes into understanding world prehistory They will be given the tools to place this knowledge in the context of the modern world acknowledging the relevance of archaeology to the concerns of today

Mapping Society: Settlement Structure in Later Bronze Age Ireland Victoria Ruth Ginn, 2016-01-22 This study examines Middle Late Bronze Age c 1750 600 BC domestic settlement patterns in Ireland The results reveal a distinct rise in the visibility and a rapid adaption of domestic architecture which seems to have occurred earlier in Ireland than elsewhere in western and northern Europe Current Approaches to Tells in the Prehistoric Old World Antonio Blanco-González, Tobias L. Kienlin, 2020-11-30 Deeply stratified settlements are a distinctive site type featuring prominently in diverse later prehistoric landscapes of the Old World Their massive materiality has attracted the curiosity of lay people and archaeologists alike Nowadays a wide variety of archaeological projects are tracking the lifestyles and social practices that led to the building up of such superimposed artificial hills However prehistoric tell dwelling communities are too often approached from narrow local perspectives or discussed within strict time and culture specific debates There is a great potential to learn from such ubiquitous archaeological manifestations as the physical outcome of cross cutting dynamics and comparable underlying forces irrespective of time and space This volume tackles tells and tell like sites as a transversal phenomenon whose commonalities and divergences are poorly understood yet may benefit from cross cultural comparison Thus the book

intends to assemble a representative range of ongoing theory and science based fieldwork projects targeting this kind of sites. With the aim of encompassing a variety of social and material dynamics the volume's scope is diachronic from the Earliest Neolithic up to the Iron Age and covers a very large region from Iberia in Western Europe to Syria in the Middle East. The core of the volume comprises a selection of the most remarkable contributions to the session with a similar title celebrated in the European Association of Archaeologists Annual Meeting held at Barcelona in 2018. In addition the book includes invited chapters to round out underrepresented areas and periods in the EAA session with relevant research programmes in the Old World. To accomplish such a cross cultural course the book takes a case based approach with contributions disparate both in their theoretical foundations from household archaeology social agency and formation theory and their research strategies including geophysical survey microarchaeology and high resolution excavation and dating.
