Radiology for the MRCP is a self assessment book for MRCP candidates comprising 180 questions each with 1 or 2 black and white images and detailed highly organized explanatory answers. The emphasis of the book is on clinical cases commonly featured in the MRCP examinations and on the new imaging modalities with which physicians need to be familiar but find gaining experience difficult. Answers are structured to reflect how answers should be presented to examiners in the various components of the MRCP Part 2 picture tests short cases long case clinical Viva. Candidates can practise and assess their interpretation skills across a wide range of clinical conditions. *Radiology for the MRCP* Jeremy Hughes, Michael Hughes, Iain D. The answers include discussion points in the format of a clinical or oral examination and clinical symptoms and signs are included wherever appropriate. **Radiology for MRCP** Sarah Howling, 2005 Radiology of the Pancreas Guy Delorme, Albert L. Baert, Lieven Van Hoe, 2012-12-06 Radiology of the Pancreas discusses the diagnostic role of the various imaging modalities currently available for the assessment of pancreatic anatomy and disease.
