Cardiac PET and PET/CT Imaging Marcello F. Di Carli,Martin J. Lipton,2007-12-05 When the history of medicine in the latter half of the twentieth century is written the advances in cardiovascular diagnosis therapy and prevention will stand out as one of the most important achievements Although the age corrected death rate secondary to coronary artery disease has declined substantially in industri ized nations during this period the prevalence of these conditions remains stubbornly high because of the aging of the population Importantly the incidence of coronary events and of one of their most important sequelae heart failure is rising ala ingly in the developing world When viewed from a global perspective cardiovascular disease is assuming a progressively greater importance and it is estimated that by 2025 it will be for the rst time in human history the most common cause of death Clearly rather than resting on the laurels of our achievements an intensi cation of the battle against cardiovascular disease must now be undertaken Cardiovascular imaging will without question play a critical role in this battle The appropriate sel tion of therapeutic measures be they pharmacologic catheter based surgical

alterations in lifestyles or some combination of these depends on accurate assessments of both cardiac structure and function. Increasingly the changes that dictate management are quite subtle and require a level of precision that was not available to clinicians heretofore.
