Paediatric Radiology Rapid Reporting Michael Paddock, Caoilfhionn Ní Leithin, Amaka C. Offiah, 2019-01-28 This book provides readers with a comprehensive evaluation of paediatric radiographs in preparation for the demanding Rapid Reporting component of the Fellowship of the Royal College of Radiologists FRCR Part 2B examination where the margin between pass and fail is very narrow While other resources may include only a handful of paediatric images in a practice reporting packet this book is dedicated solely to improving paediatric reporting skill and knowledge It is designed to address an important deficiency identified in the FRCR Part 2B Examiners Report in that many candidates struggle with interpretation of paediatric imaging even for common paediatric pathologies The ten practice tests presented each with 30 images will assist readers not only in passing the examination but also in the real world when they have to report paediatric radiographs independently The range of cases covered from neonate to adolescent delivers a sound knowledge of both common paediatric fracture patterns and patterns which are subtler but require a definitive answer as to whether they are normal or abnormal Guidance is also provided on how to describe each abnormality
