Airway to the East, 1918-1920 Clive Semple, 2012-03-19 The origins of what became officially known as No 1 Aerial Route lay in the newly formed Royal Air Forces desire to move several squadrons of the then recently designed first heavy bomber to enter service the Handley Page O 400 to the war in the Middle East The aircraft had served on the Western Front with some success although not in the long range capacity During the spring of 1918 the Wing Commander of No 5 Wing Billy Borton requested that one of the HP O 400 aircraft be flown to Egypt This was approved by Major General Sir Frederick Sykes Before the flight could proceed a great deal of planning was required since the aircrafts maximum range was only 600 miles Several refueling and maintenance bases along the route were required When planned in 1918 the route was from Paris Lyons Istres Pisa Rome Barletta Taranto Athens Crete Mersa Matru and finally Cairo Each landing station would require fuel spares and communications and back up personnel On July 50 00 1918 a new HPO 400 set off from Manston in Kent with Borton and his pilot Major McLaren plus two crew After a comparatively trouble free flight the bomber arrived in Aboukir Alexandria on the evening of 7 August As a result the RAF decided to use this route to fly several squadrons of the Handley Page bombers shortly after the war had ended The Arab leaders had found out that the Allies promise that the captured Turkish lands would be returned to them was a duplicitous lie and that France and Great Britain would take control of the area This quite naturally lead to massive unrest and rioting throughout the middle eastern lands The bombers were needed to quell the rioting and sabotage that had broken out Thus on 3 May 1919 58 Squadron set of from France on No 1 Aerial Route It was a

premature departure since many of the refueling airfields along the route were not prepared for their incoming customers. Chaos ensued by 1 November Three Squadrons had been dispatched. Of the 51 bombers sent only 26 had arrived, ten were stuck en route and 15 had been written off as broken or lost at sea and 11 aircrew had perished. This is the story of the development of the route. It would eventually form the first stage of the Imperial Air Route to Australia. *The Illustrated History of American Military Commissaries* Peter D. Skirbunt, 2008. Presents a comprehensive history spanning the 233 years of the four major services sales commissaries. [The Battle for Burma](#) Roy Conyers Nesbit, 2009-11-19. The struggle of British Commonwealth and American Chinese troops against the Japanese in Burma was one of the decisive campaigns of the Second World War. British India was threatened by the Japanese advance, the fate of the British Empire in the East hung in the balance. The tropical climate, dense malarial jungle infested with vermin and swept by monsoon rains made the fighting for both sides a remarkable feat of arms. Yet the war in Burma rarely receives the attention it deserves. Roy C Nesbit in this highly illustrated account traces the entire course of the campaign. In vivid detail he describes the British retreat and humiliation at the hands of the Japanese invaders in 1942. The Japanese were fanatical and trained in jungle warfare, well equipped and backed with an overwhelming air power. The Allied response was to build up their forces on a massive scale, eventually over 1 300 000 personnel were involved and to train them to fight in the jungle conditions. Their counter offensive launched in 1944 culminated in the battles at Imphal and Kohima which turned the course of the conflict and the reconquest of Burma was achieved just before the atom bomb was dropped. [Reckless Fellows](#) Edward Bujak, 2015-09-25. The Royal Flying Corps, later the Royal Air Force, was formed in 1912 and went to war in 1914 where it played a vital role in reconnaissance supporting the British Expeditionary Force as air cavalry and also in combat establishing air superiority over the Imperial German Air Force. Edward Bujak here combines the history of the air war including details of strategy, tactics, technical issues and combat with a social and cultural history. The RFC was originally dominated by the landed elite in Lloyd George's phrase from the stately homes in England and its pilots were regarded as knights of the air. Harlaxton Manor in Lincolnshire, seat of landed gentry, became their major training base. Bujak shows how within the circle of the RFC the class divide and unconscious superiority of Edwardian Britain disappeared, absorbed by common purpose, technical expertise and by an influx of pilots from Canada, Australia, New Zealand and South Africa. He thus provides an original and unusual take on the air war in World War I, combining military, social and cultural history. **The Flight of Rudolf Hess** Roy Conyers Nesbit, Georges van Acker, 2007-05-24. On 10 May 1941 Rudolf Hess, Deputy Fuhrer of the Third Reich, embarked on his astonishing flight from Augsburg to Scotland. At dusk the same day he parachuted on to a Scottish moor and was taken into custody. His arrival provoked widespread curiosity and speculation which has continued to this day. Why did Hess fly to Scotland? Had Hitler authorized him to attempt to negotiate peace? Was British Intelligence involved? What was his state of mind at the time? Drawing on a variety of reliable archive and eyewitness sources in Britain, Germany and the USA, authors

Roy Conyers Nesbit and Georges van Acker have written what must be the most objective assessment of the Hess story yet to be published Their compelling narrative not only dispels many of the extraordinary conspiracy theories but also uncovers some intriguing new facts

The Illustrated History of American Military Commissaries: The Defense Commissary Agency and its predecessors, since 1989 Peter D. Skirbunt,2008 Presents a comprehensive history spanning the 233 years of the four major services sales commissaries

The Oxford Illustrated History of the First World War Hew Strachan,2000 Having a profound influence on the history of the twentieth century the First World War left an intense legacy that continues to affect both those who lived through it and those who merely read about it in school It was the first conflict in which airplanes submarines and tanks played a significant role and the first in which casualties on the battlefield outnumbered those from disease It precipitated the collapse of the empires of Austria Hungary and Turkey and it promoted revolution in Russia America s entry into the war and the part it played in the peace settlement signaled the arrival on the world stage of a new great power In this extensively illustrated book an international team of experts explores the war in all its different aspects From its causes to its consequences from the strategy of the politicians to the tactics of the generals the course of the war is charted and its political and human consequences assessed The legacy of the war to end wars in poetry and prose in collective memory and political culture is with us still eighty years after that first Armistice Day This remarkable book helps us understand that legacy

Reported Missing Roy Conyers Nesbit,2009-06-25 Roy Nesbit brings to bear all the insight gained from his flying experience and his skill as a aviation historian as he investigates the wartime disappearances he describes in this haunting book In vivid detail he retells the stories of two of the best known disappearances the pioneering aviator and renowned author Antoine Saint Exupry and the photo reconnaissance ace Adrian Warburton But he also explores several less well known but equally dramatic cases the crew of a Beaufort torpedo bomber that vanished off the coast of Greece the loss of a Czech Hurricane pilot in Belgium and the disappearance of a Lancaster crew during a raid on Germany In his search to discover the fate of these lost airmen he reconstructs the circumstances of their final flights and reconstructs their last moments in the air and he puts together all the scattered pieces of evidence that have come to light since the war to explain their loss His historical detective work emphasizes the uncertainties and terrible risks that were a routine element in operational flying 60 years ago The stories make compelling reading

Ultra Versus U-Boats Roy Conyers Nesbit,John Cruickshank,2009-04-17 Keeping the Atlantic sea lanes open was a vital factor in the fight against Nazi Germany In the battle to protect merchant shipping from the menace of surface raiders and U boats Allied resolve and resources were tested to the utmost The story of the extraordinary measures that were taken to combat the threat at sea and in the air has often been told But there is one crucial element in this prolonged campaign that has still not been fully appreciated the role of code breaking in particular the decryption of secret signals transmitted by German Enigma machines And this is the focus of Roy Nesbits fascinating new account of the Battle of the Atlantic Using previously

unpublished decrypts of U boat signals selected from the National Archives along with historic wartime photographs he tells the stories of the individual U boats and describes their fate Their terse signals reveal perhaps more vividly than conventional communications could do the desperate plight of the U boatmen as they struggled against increasingly effective Allied countermeasures that eventually overwhelmed them **Missing: Believed Killed** Roy Conyers Nesbit,2010-08-19 The uncertain fates of Amelia Earhart Amy Johnson and Glenn Miller have fascinated readers and aviation historians ever since they disappeared Even today more than half a century after their final flights what happened to them is still the subject of speculation conspiracy theory and controversy This has prompted Roy Conyers Nesbit to reinvestigate their stories and to write this perceptive level headed and gripping study Using testimony from new witnesses and hitherto undisclosed public records he seeks to explain why they were reported missing believed killed He describes why American aviatrix Amelia Earhart vanished in the Pacific on her round the world flight in 1937 what caused the death of Britains aviation heroine Amy Johnson over the Thames estuary in 1941 and what really killed band leader Glenn Miller on his doomed flight to Paris in 1944 And he applies the same expert forensic eye to other tragic aerial mysteries of the period including the flying boat crash that claimed the life of the Duke of Kent in Scotland in 1942 This classic study issued here for the first time in paperback will be fascinating reading for students of aviation history and for anyone who is intrigued by tales of flights into the unknown

An Expendable Squadron Roy Conyers Nesbit,2014-08-30 Roy Nesbit s highly illustrated history of Coastal Command s 217 Squadron the squadron in which he served gives a first hand insight into the hazardous low level missions the squadron flew against enemy shipping and ports during the Second World War He chronicles the squadron s operations from the outbreak of war when it patrolled in Avro Ansons over the Western Approaches to the English Channel Then came the most intense period of its wartime career when flying Beauforts it concentrated on minelaying and attacks on shipping along the west coast of German occupied France It also mounted daring raids on huge U boat bunkers and other enemy installations The story of these dangerous operations in which many aircraft were lost and airmen were killed makes up the most memorable section of the narrative But Roy Nesbit takes the squadron s story right through to the later years of the war when after a short and even more dangerous period flying from Malta in order to sink enemy shipping in the Mediterranean it was based in Ceylon and was re equipped with Beaufighters for the battle against the Japanese In addition to telling the story of the squadron and the men who served in it the narrative describes the conditions endured by the French people in the ports 217 attacked and it covers the raids launched against German coastal bases after the squadron had moved to the Far East *An Expendable Squadron* will be absorbing reading for anyone who has a special interest in the history of Coastal Command in the aircraft 217 Squadron flew and in the experience of combat flying seventy years ago **Reader's Guide to Military History** Charles Messenger,2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general

reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations

The History of Air Intercept Radar & the British Nightfighter 1935-1959 Ian White,2007-05-30 This detailed history of Air Intercept radar traces the development of this vital military technology with the Royal Air Force during WWII In the years after World War I the United Kingdom was desperate to develop some form of protection from an enemy air strike As early as 1923 the British Army had devised sound mirrors that could detect aircraft up to twelve miles away This technical history traces the development of military radar technology from this early experimental phase to the creation of the first air to air radar systems and their uses in battle Historian Ian White sets this fascinating narrative within the larger political military economic and technological context of the era Through World War II Air Intercept radar was a vital asset in protecting RAF bomber forces as well as the country itself But developing the technology required the tireless work of physicists and engineers in the Air Ministry Research Establishment particularly members of the Establishment's Airborne Group working under Dr Edward Bowen Their Airborne Interception radars such as the AI Mk IV were used in Blenheim night fighters during the winter Blitz and by Mosquito during the Baedeker Raids This in depth history covers the introduction of centimetric technology at the Telecommunications Research Establishment the creation of centimetric AI and their installation in the Beaufighter and later marks of the Mosquito It describes the creation of the Radiation Laboratory at MIT and concludes with a section on further developments during the Cold War

Tracing Your Air Force Ancestors Phil Tomaselli,2007-07-19 Whether you are interested in the career of an individual air man or woman researching medals awarded to a pilot or crew member or just want to know more about a particular squadron or operation this book will point you in the right direction Assuming that the reader has no prior knowledge of the air force its history or organization Phil Tomaselli explains which records survive where they can be found and how they can help you in your research He also recommends resources available online as well as books and memoirs Each era in air force history is described from the pioneering days of early aviation and the formation of the Royal Flying Corps in the First World War to the creation of the Royal Air Force its operations during the Second World War and its postwar development The author explains the evolving organization of the air force in each period He also provides pointers and examples which should help researchers find the records of units and bases that individuals served in

RAF Fighters Before the Storm Martin Derry,Neil Robinson,2024-07-30 When the First World War ended the then recently established Royal Air Force was awash with aircraft of all descriptions More surprising perhaps was the fact that despite an ongoing cull of obsolescing types on the last day of 1919 the RAF still possessed 9 122 non obsolete aircraft with a further 1 100 more assigned to the Fleet Air Arm while the famous SE 5A and Sopwith Camel had by this time largely been consigned to history the RAF possessed no less

than 1 860 Sopwith Snipes which from 1920 would become the RAF's standard single seat fighter for years to come Other core types on charge on 31 December 1919 included some 1 650 Bristol F 2B fighters and 1 250 de Havilland DH 9As which together with the Snipe accounted for over fifty per cent of the RAF's inventory at that time Avro 504 training aircraft accounted for a further 2 700 airframes In this Flight Craft Special the authors provide a detailed and informative pictorial history of those scout fighter aircraft that served in an operational capacity with the RAF from January 1920 until the last day of 1939 a period in which Britain once again moved from an era of peace to war with an old enemy albeit this time Hitler's totalitarian National Socialist Germany as opposed to the Imperial Germany of old As well as covering each of the fighter types used during the inter war period and featuring most of the squadrons the photographs themselves convey the sense of the technical advances that rapidly took root within Britain's aero industries from the mid 1930s onwards moving from the brightly marked overall silver wood and linen biplanes to the dull camouflaged metal skinned monoplanes The progression of machine gun development from the Lewis and Vickers of the First World War to the later Browning is covered spanning the days of the biplanes two fixed synchronised Lewis or Vickers 303 inch machine guns mounted in the forward fuselage to eight wing mounted 303 inch Browning machine guns in the new monoplane fighters There is also a small but fascinating section on the monoplane also runs the monoplane fighters that were designed and had prototypes built but failed to reach the finishing post
