RAF Bomber Command and Its Aircraft: 1941-1945 James Goulding, 1975 *The RAF and Aircraft Design* Colin S Sinnott, 2014-05-22 This work examines the evolution of the RAF's operational requirements for its home defence air force for bombers to mount a deterrent counter offensive and for fighters to provide direct defence of Britain. It discusses the management processes, policies and decisions relevant to operational requirements on the basis of a detailed study of Air Ministry papers of the time. By tracing the development of operational requirements, the author exposes the thinking behind the RAF's quest for effective fighter and bomber aircraft. He describes the ideas and concepts of air warfare that were adopted in the 1920s and shows how these evolved into the Air Staff's requirements for the aircraft which the RAF entered and fought in World War II A - Airports British Library, 2012-05-21 No detailed description available for A Airports

The Hercules Gordon A. A. Wilson, 2024-08-15 What links the Bristol Aeroplane Company, Armstrong Whitworth, AVRO Short Brothers PLC, Handley Page Ltd and Vickers Aviation? The Hercules engine **Operation Oyster: World War II's Forgotten Raid** Kees Rijken, Paul Schepers, Arthur G. Thorning, 2014-08-15 Operation Oyster was carried out on the 6th December 1942 by 2 Group RAF. Considered to be a notable success for the allies, it cost the Germans an estimated six months of lost production time at a critical point in the conflict. It is arguable, according to the authors, that the operation was in fact rather more significant than Operation Chastise, the Dambuster raid, while accepting that was a remarkable feat of arms. Operation Oyster struck at the very heart of what Churchill termed the wizard war against German radio navigational technology by attacking a central hub of activity, the Philips Radio Works in Eindhoven, The Netherlands. The development of electronics in WWII was the most significant technical aspect of weaponry over the course of the conflict. On both sides, there were great advances in radar and communications, which at that time depended on the wide-scale use of high-frequency radio valves. Few companies had the technology to produce these, but the leading one in Europe was Philips in Eindhoven. Thus, it was determined that Philips was the most important target. Ninety-three allied aircraft took part, and a total of fourteen were lost. But the result, in terms of damages to the enemy, was considerable, hindering the German war effort significantly and consequently aiding the allies. Despite these facts, however, the story of the raid has been underreported, and the efforts of the aircrew who took part have been little recognized. By comparison, the Dambuster raid, which came six months later, has entered into folklore. Here, for the first time, the overlooked Oyster raid is afforded the attention it deserves The Battle of Britain, 1945-1965 Garry Campion, 2015-10-06 Seventy-five years after the Battle of Britain, the Few's role in preventing invasion continues to enjoy a revered place in popular memory. The Air Ministry were central to the battle's valorisation. This book explores both this and also the now-forgotten 1940 Battle of the Barges, mounted by RAF bombers **The Lancaster** Gordon A. A. Journey's End Kevin Wilson, 2010-06-10 A brilliant insight into life in the air and on the ground. Observer, 12 February

1945 British and American bombers rained down thousands of tons of incendiaries on the city of Dresden killing an estimated 25 000 people and destroying one of the most beautiful cities in Europe The controversy that erupted shortly afterwards and which continues to this day has long overshadowed the other events of the bomber war and blighted the memory of the young men who gave their lives to fight in the skies over Germany Journey s End neither condemns nor condones the bombing of Dresden but puts it in its proper context as part of a much larger campaign To the young men who flew over Germany night after night there were other much more pressing worries the V2 rockets that threatened their loved ones at home the brand new German jet fighters that could strike them at speeds of over 600mph They lived life at a heightened tempo during these final unforgiving months of the bomber war when no quarter was given on either side As the climactic volume in Kevin Wilson s acclaimed bomber war trilogy Journey s End chronicles the brutal endgame of a conflict that caused such devastation and tragedy on both sides *The Crucible of War, 1939-1945* Brereton Greenhous, Sydney F. Wise, Canada. Department of National Defence, Canada. Royal Canadian Air Force, Stephen J. Harris, William C. Johnston, William C.
