In describing the till I remarked that the irregular manner in which the stones were scattered through that deposit imparted to it a confused and tumultuous appearance The clay does not arrange itself in layers or beds but is distinctly unstratified The material consisted of earth gravel and stones and also in some places broken trunks or branches of trees Part of it was deposited in a pell mell or unstratified condition during the progress of the period and part either stratified or unstratified in the opening part of the next period when the ice melted Ragnarok Ignatius Donnel,2020-04-14
