Subject to Change : Guerrilla Television Revisited Deirdre Boyle Professor of History New York University,1997-02-25 Before the Internet camcorders and hundred channel cable systems predating the Information Superhighway and talk of cyber democracy there was guerilla television Part of the larger alternative media tide which swept the country in the late sixties guerilla television emerged when the arrival of lightweight affordable consumer video equipment made it possible for ordinary people to make their own television Fueled both by outrage at the day s events and by the writings of people like Marshall McLuhan Tom Wolfe and Hunter S Thompson the movement gained a manifesto in 1971 when Michael Shamberg and the raindance Corp published Guerilla Television As framed in this quixotic text the goal of the video guerilla was nothing less than a reshaping of the structure of information in America In Subject to Change Deidre Boyle tells the fascinating story of the first TV generation s dream of remaking television and their frustrated attempts at democratizing the medium Interweaving the narratives of three very different video collectives from the 1970s TVTV Broadside TV and University Community Video Boyle offers a thought provoking account of an earlier electronic utopianism one with significant implications for today s debates over free speech public discourse and the information explosion

A Study of Shang Dynasty Aesthetic Consciousness Zhu Zhirong,2024-09-11

This book explores the aesthetic consciousness of the Shang Dynasty and its influence on Chinese aesthetic development and contemporary aesthetic creation. The Shang Dynasty is the first era in China with authentic historical documentation. Its artifacts and inscriptions have great aesthetic value and serve as vivid and rich records of aesthetic concepts. By examining the production and use of pottery, jade, bronze, and oracle bone inscriptions, the book sheds light on the functions of these creations as media for conveying emotions driven by human nature. By discussing how the Shang script was invented and used, the author explores the significant role it played in the development of the aesthetic consciousness of the Chinese ancients. Based on surviving documents including the hexagrams in the *Book of Changes*, the Pan Geng in the *Book of Documents*, and the Shang Songs in the *Book of Songs*, he further examines the poetic characteristics of Shang literature, recognizing it as both historically and literarily significant. The title is essential reading for scholars, students, and general readers interested in Chinese aesthetics, ancient Chinese civilization, culture, and art. **Subject to Change** Deirdre

Boyle, 1997-03-27. Before the Internet, camcorders, and hundred channel cable systems predating the Information Superhighway, and talk of cyber democracy, there was guerilla television. Part of the larger alternative media tide which swept the country in the late sixties, guerilla television emerged when the arrival of lightweight, affordable consumer video equipment made it possible for ordinary people to make their own television. Fueled both by outrage at the day's events and by the writings of people like Marshall McLuhan, Tom Wolfe, and Hunter S. Thompson, the movement gained a manifesto in 1971 when Michael Shamberg and the Raindance Corp. published *Guerilla Television*. As framed in this quixotic text, the goal of the video guerilla was nothing less than a reshaping of the structure of information in America. In *Subject to Change*, Deirdre Boyle tells the fascinating story of the first TV generation's dream of remaking television and their frustrated attempts at democratizing the medium. Interweaving the narratives of three very different video collectives from the 1970s: TVTV, Broadside TV, and University Community Video, Boyle offers a thought-provoking account of an earlier electronic utopianism, one with significant implications for today's debates over free speech, public discourse, and the information explosion. *Dance as Third Space* Heike Walz, 2021-12-06. Dance plays an important role in many religious traditions in rites of passage, processions, healing rituals, or festivals. But it is also controversial, especially in Christianity. Colonial European Christian discourses tend to separate dance from religion and spirituality. This volume explores dance as Third Space, following Homi Bhabha's postcolonial metaphor. The Inter Dance approach combines interdisciplinary theoretical considerations with case studies. International experts examine dance controversies and discourses from the early church to World Christianity, as well as in Hasidic Judaism, Greek mysteries, Islamic Sufism, West African Togolese religions, and Afro-Brazilian Umbanda. Christian dance theologies are unfolded, and the boundary-crossing potential of dance in interreligious and intercultural encounters is explored. The volume breaks new ground in how dance as ephemeral performative art embodied thought and gendered discourse can transform studies of religion. Untamed Anita Silvey, 2015. This biography

for children will trace Goodall's life but each chapter will also focus on two or more of the chimpanzees that she observed with information in sidebars about these particular animals. Along with biographical details the book will explore the ethical issues that surround Goodall's work and show what has changed in our understanding of Great Apes. What do we know today about these animals in terms of language speech tool use and DNA? How has sophisticated technology GPS systems Satellite imagery portable digital microphones been used to gain new information about animal populations?
