Australian National Bibliography: 1992 National Library of Australia, 1988

An Introduction to Global Environmental Issues Lewis A. Owen, Professor Kevin T. Pickering, Kevin T. Pickering, 2006-03-01 An Introduction to Global Environmental Issues presents a comprehensive and stimulating introduction to the key environmental issues presently threatening our global environment Offering an authoritative introduction to the key topics a source of latest environmental information and an innovative stimulus for debate this is an essential book for all those studying or concerned with global environmental issues Major global environmental issues are brought into focus Explanations of the evolution of the earth's natural systems hydrosphere biosphere geosphere ecosphere provide an essential understanding of the scientific concepts processes and historical background to environmental issues Contemporary socio economic cultural and political considerations are explored and important conceptual approaches such as Gaian hypotheses and Chaos Theory are introduced Human impact and management of the natural environment and concerns for maintaining biodiversity are emphasised throughout Specific features include Case studies drawn from across the world Superb illustrations 4 colour plate sections a wealth of informative diagrams Glossary of key terms with key concepts highlighted throughout the text Annotated guides to further reading Chapter summaries and key points A Lecturers Manual is available to accompany the text This 2nd Edition has been extensively revised and expanded to include many new illustrations up to date data including the latest IPCC data and the most recent events including Kobe earthquake French nuclear testing the Berlin conference and the Antarctic Treaty Sections on ecosystems techniques pollution tectonics risk and hazard mitigation world populations and issues of human impact and environmental management have been particularly expanded in this new edition

50 Simple Steps to Save the World's Rainforests Kim Henderson, The Green Patriot Working Group, 2012-03-12 Despite the very best conservation and environmental policy making efforts at least 80 000 acres of tropical rainforest disappear each day If action is not taken now experts estimate that the world's rainforests will mostly disappear within 50 years Currently the destruction of tropical forests is responsible for 17 percent of man made carbon emissions more than what comes from all the world's cars airplanes and ships combined Tropical rainforests need our help and that's where 50 Simple Steps to Save the World's Rainforests comes in The future of the world's rainforests lies to a large extent in the collective hands of consumers and how they shop

since demand is what fuels the forces driving deforestation agriculture logging and resource extraction Through the 50 step journey you will learn how as a consumer you may unwittingly support rainforest destruction and more importantly precisely how you can make different choices that help save rainforests For example you will learn how your paper use and purchases of rayon clothing affect Indonesian rainforests where Sumatran tigers are critically endangered or how simply eating Brazil nuts helps save the Amazon rainforest You will discover how the cultivation of palm oil a common ingredient in confections baked goods soaps and biofuels is fueling rampant deforestation in Malaysia Indonesia and Papua New Guinea and how you can avoid it 50 Simple Steps to Save the Rainforests is the ultimate primer for anyone wanting to take action to help save this ecosystem which is so critical to the future of mankind Rainforest Tourism, Conservation and Management Bruce Prideaux, 2014-09-19 Globally rainforests are under threat on numerous fronts including clearing for agriculture harvesting for timber and urban expansion Yet they have a crucial role in biodiversity conservation climate change mitigation and providing other ecosystem services As the term is used in this book rainforests include both temperate and tropical although the emphasis is on tropical rainforests Rainforests are also attractive tourist spaces and where they have been used as a tourism resource have generated significant income for local communities However not all use of rainforests as a tourism resource has been sustainable This book argues that sustainability must be the foundation on which tourism use of this complex but ultimately fragile ecosystem must be built upon It provides a multi disciplinary perspective incorporating rainforest science management and tourism issues The book is organized into four sections commencing with Rainforest Ecology and Management followed by People and Rainforests Opportunities for Rainforest Tourism Development and finally Threats to Rainforests Each major rainforest region is covered including the Amazon Central America Africa Australia and south east Asia in the context of a specific issue For example rainforests in Papua New Guinea are examined in the context of community based ecotourism development while the rainforests in Borneo are discussed in an examination of wildlife issues Other issues covered in this manner include governance empowerment issues for rainforest peoples and climate change

Resources in Education ,2000-04 Current Issues in Non-timber Forest Products Research Manuel Ruiz Pérez, J. E. M. Arnold, Yvonne Byron, 1996-01-01 *Rainy, Windy, Snowy, Sunny Days* Phyllis J. Perry, 1996-03-15 Integrate language arts with science social studies and mathematics This book provides summaries of children s literature and nonfiction books related to rain wind snow and sunshine Suggestions of books that combine elements of fiction and nonfiction help students move easily from fiction to nonfiction reading Discussion starters and student activities extend learning with books that range from simple picture books to full length chapter books All have been recommended by children s librarians and with copyrights after 1980 are readily available Grades K 5 **Life in a Rain Forest** Anne Welsbacher, 2003-01-01 Describes the ecosystems of the rain forests of Hawaii how human activities have affected these forests and what is being done to protect them **Social Issues and Service at the Middle Level** Samuel Totten, Jon Pedersen, 2009-06-01 originally published by
