**Inscribed Power** Ryan D. Giles, 2017-09-18 In *Inscribed Power* Ryan D. Giles explores the function of amuletic prayers, divine names, and incantation formulas that were inscribed and printed on parchment paper and other media and at the same time inserted into classic literary works in Spain. Giles' insightful analysis of the intersection between amulets and literary texts offers fresh and original interpretations of well-known texts such as the *Poema de m o Cid*, the *Libro de Alexandre*, the *Libro de buen amor*, *Celestina*, *Lazarillo de Tormes*, and the *Busc n*. *Inscribed Power* is a fascinating work that highlights specific amuletic texts that were used to heal, protect, or otherwise provide a blessing or curse to discover how their powers could influence fictional lives at different moments in the development of Spanish literature. [Capturing Sound](#) Mark Katz, 2004-11 There is more to sound recording than just recording sound. Far from being simply a tool for the preservation of music, the technology is a catalyst. This is the clear message of *Capturing Sound*, a wide-ranging, deeply informative, consistently entertaining history of recording's profound impact on the musical life of the past century, from Edison to the Internet. In a series of case studies, Mark Katz explores how recording technology has encouraged new ways of listening to music, led performers to change their practices, and allowed entirely new musical genres to come into existence. An accompanying CD featuring thirteen tracks from Chopin to Public Enemy allows readers to hear what Katz means when he discusses music as varied as King Oliver's *Dippermouth Blues*, a Jascha Heifetz recording of a Brahms Hungarian Dance, and Fatboy Slim's *Praise You*. The Zoomorphic Imagination in Chinese Art and Culture Jerome Silbergeld,Eugene Y. Wang,2016-10-31 China has an age old zoomorphic tradition The First Emperor was famously said to have had the heart of a tiger and a wolf The names of foreign tribes were traditionally written with characters that included animal radicals In modern times the communist government frequently referred to Nationalists as running dogs and President Xi Jinping vowing to quell corruption at all levels pledged to capture both the tigers and the flies Splendidly illustrated with works ranging from Bronze Age vessels to twentieth century conceptual pieces this volume is a wide ranging look at zoomorphic and anthropomorphic imagery in Chinese art The contributors leading scholars in Chinese art history and related fields consider depictions of animals not as simple one for one symbolic equivalents they pursue in depth in complexity and in multiple dimensions the ways that Chinese have used animals from earliest times to the present day to represent and rhetorically stage complex ideas about the world around them examining what this means about China past and present In each chapter a specific example or theme based on real or mythic creatures is derived from religious political or other sources providing the detailed and learned examination needed to understand the means by which such imagery was embedded in Chinese cultural life Bronze Age taotie motifs calendrical animals zoomorphic modes in Tantric Buddhist art Song dragons and their painters animal rebuses Heaven sent auspicious horses and foreign sent tribute giraffes the fantastic specimens depicted in the Qing *Manual of Sea Oddities* the weirdly indeterminate creatures found in the contemporary art of

**Beyond Heaven and Earth** Gabriel Levy, 2022-02-01 An approach to understanding religion that draws on both humanities and natural science but rejects approaches that employ simple monisms and radical dualisms In Beyond Heaven and Earth Gabriel Levy argues that collective religious narratives and beliefs are part of nature they are the basis for the formation of the narratives and beliefs of individuals Religion grows out of the universe but to make sense of it we have to recognize the paradox that the universe is both mental and material or neither We need both humanities and natural science approaches to study religion and religious meaning Levy contends but we must also recognize the limits of these approaches First we must make the dominant metaphysics that undergird the various disciplines of science and humanities more explicit and second we must reject those versions of metaphysics that maintain simple monisms and radical dualisms Bringing Donald Davidson s philosophy a form of pragmatism known as anomalous monism to bear on religion Levy offers a blueprint for one way that the humanities and natural sciences can have a mutually respectful dialogue Levy argues that in order to understand religions we have to take their semantic content seriously We need to rethink such basic concepts as narrative fiction information agency creativity technology and intimacy In the course of his argument Levy considers the relation between two closely related semantics fiction and religion and outlines a new approach to information He then applies his theory to discrete cases ancient texts modern media and intimacy
