Rainfall Simulation Runoff And Soil Erosion Catena Supplement 4:

Soil Erosion Danilo Godone, Silvia Stanchi, 2011-11-21 Soil erosion affects a large part of the Earth surface and accelerated soil erosion is recognized as one of the main soil threats compromising soil productive and protective functions. The land management in areas affected by soil erosion is a relevant issue for landscape and ecosystems preservation. In this book we collected a series of papers on erosion not focusing on agronomic implications but on a variety of other relevant aspects of the erosion phenomena. The book is divided into three sections: i various implications of land management in arid and semiarid ecosystems; ii erosion modeling and experimental studies; iii other applications e.g. geoscience engineering. The book covers a wide range of erosion related themes from a variety of points of view: assessment, modeling, mitigation, best practices, etc.

Managing Soils and Terrestrial Systems Brian D. Fath, Sven Erik Jorgensen, 2020-07-29 Bringing together a wealth of knowledge, *Environmental Management Handbook* Second Edition gives a comprehensive overview of environmental problems, their sources, their assessment, and their solutions. Through in-depth entries and a topical table of contents, readers will quickly find answers to questions about environmental problems and their corresponding management issues. This six-volume set is a reimagining of the award-winning *Encyclopedia of Environmental Management* published in 2013 and features insights from more than 400 contributors, all experts in their field. The experience, evidence, methods, and models used in studying environmental management are presented here in six stand-alone volumes arranged along the major environmental systems. Features: The first handbook that demonstrates the key processes and provisions for enhancing environmental management. Addresses new and cutting-edge topics on ecosystem services, resilience, sustainability, food, energy, water, nexus, socio-ecological systems, and more. Provides an excellent basic knowledge on environmental systems, explains how these systems function, and offers strategies on how to best manage them. Includes the most important problems and solutions facing environmental management today. In this third volume, *Managing Soils and Terrestrial Systems*, the general concepts and processes of the geosphere with its related soil and terrestrial systems are introduced. It explains how these systems function and provides strategies on how to best manage them. It serves as an excellent resource for finding basic knowledge on the geosphere systems and includes important problems and solutions that environmental managers face today. This book practically demonstrates the key processes, methods, and models used in studying environmental management.

Monitoring and Modelling Dynamic Environments Alan P. Dykes, Mark Mulligan, John Wainwright, 2015-09-28 The *Times Obituaries* 4 August 2008 reported that John Thornes was one of the most eminent and influential physical geographers of his generation. John's keen interest in understanding landform processes and evolution was furthered through a variety of methods and informed across a range of disciplinary boundaries. In particular, he pushed for better integration of monitoring, theoretical, and simulation modelling, field and laboratory experimentation, and remote sensing techniques. Although dominated by an interest in the Mediterranean region and problems of land degradation, his

research activities ranged across a number of time scales and with other environmental perspectives This collection of papers reflects this wide range of John s interests through the recent work of scientists and professionals most strongly influenced by his rigorous training or leadership The thematic focus of the book which runs through all of the main contributions is the integration of different methodologies and the application of this approach to improved understanding of natural systems and the development of appropriate strategies for environmental and resource management Short overviews of John s contributions to geomorphological research are also presented to provide context for the origins of this book

Catena Supplement ,1988 Geomorphology of Upland Peat Martin Evans,Jeff Warburton,2011-03-29 The Geomorphology of Upland Peat offers a detailed synthesis of existing literature on peat erosion incorporating new research ideas and data from two leading experts in the field Presents the most detailed and current work to date Written in a style that is both intelligent and accessible Fully illustrated with original drawings and photographs Relevant and information for a broad audience working on organic sediments in various environments *Geomorphology of Desert Environments* Anthony J. Parsons,A. D. Abrahams,2009-03-20 About one third of the Earth s land surface experiences a desert climate and this area supports approximately 15% of the planet s population This percentage continues to grow and with this growth comes the need to acquire and apply an understanding of desert geomorphology Such an understanding is vital in managing scarce and fragile resources and in mitigating natural hazards This authoritative reference book is comprehensive in its coverage of the geomorphology of desert environments and is arranged thematically It begins with an overview of global deserts proceeds through treatments of weathering hillslopes rivers piedmonts lake basins and aeolian surfaces and concludes with a discussion of the role of climatic change Written by a team of international authors all of whom are active in the field the chapters cover the spectrum of desert geomorphology **Agricultural Nonpoint Source Pollution** A. Giorgini,F. Zingales,2013-10-22 This volume contains most of the scientific contributions to the workshop Prediction of Agricultural Nonpoint Source Pollution Model Selection and Application held in Venice in the historic Ca Vendramin Calergi in June 1984 Other contributions of specialists who were not able to attend the workshop have also been included in an attempt to make the work more complete It is hoped that this collection will be useful to planners who operate in the field of agricultural diffuse source pollution since several contributions are state of the art presentations and others are specialized studies by American and European researcher Environmental Reconstruction in Mediterranean Landscape Archaeology Philippe Leveau,Kevin Walsh,Frederic Tremont,2016-10-31 Contents include Introduction K Walsh Palynology S Bottema A database for the palynological recording of human activity V Andrieu E Brugiapaglia R Cheddadi M Reille and J L de Beaulieu The contribution of anthracology J L Vernet Dendroclimatology F Guibal Techniques in Landscape Archaeology A G Brown L apport de la micromorphologie des sols N F doroff Reconstructing past soil environments R S Shiel The Geochemistry of Soil Sediments D D Gilbertson and J P Grattam Searching the Ports of Troy E Zanagger M Timpson S Yazvenko and H Leiermann
