The Politics of Beginning Alejandro Esguerra,2025-09-10 The Politics of Beginning traces the formation of the Forest Stewardship Council FSC now the most authoritative private organization for forestry certification It starts with recounting the highly politicized forest politics of the late 1980s when activists protested human rights abuses and deforestation while experimenting with sustainable forestry practices The book then follows the people who became the founding members of the Forest Stewardship Council By using live audio recordings of the FSC founding assembly in 1993 this book provides an in depth analysis of a constitutional moment for private authority in world politics To explore how timber merchants Indigenous communities and social and environmental NGOs engaged in private institution making Alejandro Esguerra works with the concept of translation developed in Actor Network Theory a process in which knowledge about governance is continuously recontextualized and introduces it to International Relations theory He develops a dramaturgical methodology with

metaphors of theatre such as stage script and performance This methodology can be used to analyze the ways in which activists and others translate knowledge about governance and the practices of inclusion and exclusion that appear during this process The environmental crisis requires a transformation in the ways societies value and govern human nature relations and The Politics of Beginning reveals the conditions under which even formerly antagonistic actors start developing a common political project

50 Simple Steps to Save the World's Rainforests Kim Henderson, The Green Patriot Working Group, 2012-03-12 Despite the very best conservation and environmental policy making efforts at least 80 000 acres of tropical rainforest disappear each day If action is not taken now experts estimate that the world's rainforests will mostly disappear within 50 years Currently the destruction of tropical forests is responsible for 17 percent of man made carbon emissions more than what comes from all the world's cars airplanes and ships combined Tropical rainforests need our help and that's where 50 Simple Steps to Save the World's Rainforests comes in The future of the world's rainforests lies to a large extent in the collective hands of consumers and how they shop since demand is what fuels the forces driving deforestation agriculture logging and resource extraction Through the 50 step journey you will learn how as a consumer you may unwittingly support rainforest destruction and more importantly precisely how you can make different choices that help save rainforests For example you will learn how your paper use and purchases of rayon clothing affect Indonesian rainforests where Sumatran tigers are critically endangered or how simply eating Brazil nuts helps save the Amazon rainforest You will discover how the cultivation of palm oil a common ingredient in confections baked goods soaps and biofuels is fueling rampant deforestation in Malaysia Indonesia and Papua New Guinea and how you can avoid it 50 Simple Steps to Save the Rainforests is the ultimate primer for anyone wanting to take action to help save this ecosystem which is so critical to the future of mankind

Beginning With Brandon's Interest Albert Osei, 2010-01-01 This book provides a critical account and analysis of one child on the autism spectrum who throughout his life has demonstrated that interest based education offers children with autism problem solving skills to deal with the myriad of problems that prevent educators as well as learners from developing an effective communication Traditionally behaviors of children with autism have been studied by researchers from diverse disciplines On the other hand many of these studies have grossly misrepresented autism related behaviors The problem has been the role given to the applied behaviour analysis ABA by behavior experts as a colander for understanding differences in autism The book reveals another flaw in autism studies and that is how researchers have harnessed their findings into an institutional effort permitting them to mandate and discriminate between differences in behaviours in autism This dilemma has prevented many parents from employing their best practices to advance their children's interest and skills beyond the institutional frontier This book invites readers to experience how one child with autism communicated his interest and skills beyond the conformist maxim to advance his language social and academic skills
