Worker Mary Nejedly, 2021-09-01 Studies of child labour have examined the experiences of child workers in agriculture mining and textile mills yet surprisingly little research has focused on child labour in manufacturing towns This book investigates the extent and nature of child labour in Birmingham and the West Midlands from the mid eighteenth century to the end of the nineteenth century It considers the economic contributions of child workers under the age of 14 and the impact of early work on their health and education Child labour in the region was not a short lived stage of the early Industrial Revolution but an integral part of industry throughout the nineteenth century Parents regarded their children as potentially valuable contributors to the family economy encouraging families to migrate from rural areas so that their children could work from an early age in the manufacture of pins nails buttons glass locks and guns as well as tin plating carpet weaving brass casting and other industries The demand for young workers in Birmingham was greater than that for adults in Mary Nejedly s detailed analysis the importance of children s earnings to the family economy becomes clear as well as the role played by child workers in industrialisation itself In view of the economic benefit of children s labour to families as well as employers both children s education and health could and did suffer As well as working at harmful processes that produced dangerous fumes and dust or exposed them to poisonous substances children also suffered injuries in the workplace mainly to the head eyes and fingers and were often subjected to ill treatment from adult workers The wide gulf in economic circumstances that existed between the families of skilled workers and those of unskilled workers unemployed workers or single parent families also becomes evident Attitudes towards childhood changed over the course of the period however with a greater emphasis being placed on the role of education for all children as a means of reducing pauperism and dependence on the poor rate Concerns about health also gradually emerged together with laws to limit work for children

both by age and hours worked Mary Nejedly's clear-eyed research sheds fresh light on the life of working children and increases our knowledge of an important aspect of social and economic history Virtue Ethics Liezl van Zyl, 2018-07-03

This volume provides a clear and accessible overview of central concepts, positions and arguments in virtue ethics today. While it focuses primarily on Aristotelian virtue ethics, it also includes discussion of alternative forms of virtue ethics: sentimentalism and pluralism and competing normative theories: consequentialism and deontology. The first six chapters are organized around central questions in normative ethics that are of particular concern to virtue ethicists and their critics: What is virtue ethics? What makes a trait a virtue? Is there a link between virtue and happiness? What is involved in being well-motivated? What is practical wisdom? What makes an action right? The last four chapters focus on important challenges or objections to virtue ethics: Can virtue ethics be applied to particular moral problems? Does virtue ethics ultimately rely on moral principles? Can it withstand the situationist critique? What are the prospects for an environmental virtue ethics?

Raising Good Children Thomas Lickona, 2012-05-02 Raising decent, caring and responsible children is the most complex and challenging job in every parent's life and an increasingly difficult one in today's society. Here is the most authoritative book available on this crucial subject: a valuable and sensitive guide for parents who want their children to grow up with lifelong positive values. Based on fascinating research, this groundbreaking work by psychologist and educator Dr. Thomas Lickona describes the predictable stages of moral development from birth to adulthood. And it offers you down-to-earth advice and guidance for each stage: Seven caring ways to discipline terrible twos. Why your preschooler lies and how to handle it. What to do about a four-year-old's back talk. How to handle your seven-year-old's endless negotiations about what's fair. Why teens have trouble with peer pressure and how to help them. How to talk to your child about drugs, drinking and sex. How to help children of any age reason more clearly about what's right and wrong. PLUS: A list of more than one hundred children's books that teach moral values and much more. An excellent book on a vastly neglected aspect of raising children. Dr. Fitzhugh Dodson, author of *How to Parent* and *How to Father*: We have been waiting for a book like this for a long time, a readable work that translates a moral development theory into parents' language and experience. Dolores Curran, author of *Traits of a Healthy Family*: Truly integrates a moral development theory into a consistent approach to childrearing. Word of mouth recommendations from parent to parent may lift it to the level of popularity once held by Dr. Spock's book on child care. Moral Education Forum

Children and Childhood: Practices and Perspectives Chandni Basu, Vicky Anderson-Patton, 2019-01-04. This volume was first published by Interdisciplinary Press in 2013. Theoretical discourse surrounding childhood has been complimented by various development initiatives taken in different parts of the world, and research has emerged as an important component of this focus, which would carry forward the intellectual and other engagements concerning children and childhood. This volume brings together diverse theoretical and practical deliberations on children and childhood from various parts of the world. It explores conceptual understandings of childhood, extending from historical perspectives to extreme expressions of negativity like childism. An historical perspective illuminates the image and imagination of the child in various art forms. The constructed connotation of childhood is portrayed through its cultural comparisons.
