Power Generation Through Renewable Sources of Energy B. R. Pai, M. S. Rama Prasad, 1991

Renewable Energy Nick Jelley, 2020-02-27 Energy is vital for a good standard of living and much of the world's population does not have enough Affordable and adequate sources of power that do not cause climate change or pollution are crucial and renewables provide the answer Wind and solar farms can now provide the cheapest electricity in many parts of the world Moreover they could provide all of the world's energy needs But while market forces are fast helping the transition from fossil fuels to renewables there are opposing pressures such as the USA's proposed withdrawal from the Paris Agreement and the vested interests in fossil fuels This Very Short Introduction describes the main renewable sources of energy solar wind hydropower and biomass as well as the less well developed ones geothermal tidal and wave Nick Jelley explains the challenges of integrating renewables into electricity grids and the need for energy storage and for clean heat and discusses the opportunities in developing countries for renewable energy to empower millions He also considers international efforts and policies to support renewables and tackle climate change and explains recent innovations in wind and solar energy production battery storage and in the emerging power to gas provision for clean heating Throughout he emphasises what renewable energy can deliver and its importance in tackling climate change and in improving health welfare and access to electricity
