evaluates in detail the parallels that exist between Peircean and Hegelian thought highlighting their convergences and also the points at which Peirce departs from Hegel's position. It also considers the work of Vygotsky on concept formation showing that both are in fact working within the same Hegelian template. This book therefore contributes to our broader understanding of Peircean semiotics. But by drawing in Vygotsky under the same theoretical auspices it demonstrates that Peirce has much to offer contemporary educational learning theory.
