Oshima,2014-07-22 Representations of Lie Groups Kyoto Hiroshima 1986 contains the proceedings of a symposium on Analysis on Homogeneous Spaces and Representations of Lie Groups held on September 1 6 1986 in Japan The symposium provided a forum for discussing Lie groups and covered topics ranging from geometric constructions of representations to the irreducibility of discrete series representations for semisimple symmetric spaces A classification theory of prehomogeneous vector spaces is also described Comprised of 22 chapters this volume first considers the characteristic varieties of certain modules over the enveloping algebra of a semisimple Lie algebra such as highest weight modules and primitive quotients The reader is then introduced to multiplicity one theorems for generalized Gelfand Graev representations of semisimple Lie groups and Whittaker models for the discrete series Subsequent chapters focus on Lie algebra cohomology and holomorphic continuation of generalized Jacquet integrals the generalized Geroch conjecture algebraic structures on virtual characters of a semisimple Lie group and fundamental groups of semisimple symmetric spaces The book concludes with an analysis of the boundedness of certain unitarizable Harish Chandra modules This monograph will appeal to students specialists and researchers in the field of pure mathematics

Representation Theory and Analysis on Homogeneous Spaces Semen Grigor'evich Gindikin,1994 A combination of new results and surveys of recent work on representation theory and the harmonic analysis of real and p adic groups Among the topics are nilpotent homogeneous spaces multiplicity formulas for induced representations and new methods for constructing unitary representations of real reductive groups The 12 papers are from a conference at Rutgers University February 1993 No index Annotation copyright by Book News Inc Portland OR **The Penrose Transform and Analytic Cohomology in Representation Theory** Michael G. Eastwood,1993 This book contains refereed papers presented at the AMS IMS SIAM Summer Research Conference on the Penrose Transform and Analytic Cohomology in Representation Theory held in the summer of 1992 at Mount Holyoke College The conference brought together some of the top experts in representation theory and differential geometry One of the issues explored at the conference was the fact that various integral transforms from representation theory complex integral geometry and mathematical physics appear to be instances of the same general construction which is sometimes called the Penrose transform There is considerable scope for further research in this area and this book would serve as an excellent introduction   The Mathematical Legacy of Harish-Chandra Robert S. Doran,2000 Harish Chandra was a mathematician of great power vision and remarkable ingenuity His profound contributions to the representation theory of Lie groups harmonic analysis and related areas left researchers a rich legacy that continues today This book presents the proceedings of an AMS Special Session entitled Representation Theory and Noncommutative Harmonic Analysis A Special Session Honoring the Memory of Harish Chandra which marked 75 years since his birth and 15 years since his untimely death at age 60 Contributions to the volume were written by an outstanding

group of internationally known mathematicians Included are expository and historical surveys and original research papers The book also includes talks given at the IAS Memorial Service in 1983 by colleagues who knew Harish Chandra well Also reprinted are two articles entitled Some Recollections of Harish Chandra by A Borel and Harish Chandra s c Function A Mathematical Jewel by S Helgason In addition an expository paper An Elementary Introduction to Harish Chandra s Work gives an overview of some of his most basic mathematical ideas with references for further study This volume offers a comprehensive retrospective of Harish Chandra s professional life and work Personal recollections give the book particular significance Readers should have an advanced level background in the representation theory of Lie groups and harmonic analysis **Harmonic Analysis on Reductive Groups** W.
