*Representing the Royal Navy* Margarette Lincoln, 2017-05-15 From the mid 18th century up till after memories of the Napoleonic wars and the glories of Nelson's navy had faded the Royal Navy was the bulwark of Britain's defence and the safeguard of trade and imperial expansion While there have been political and military histories of the Navy in this period looking at battles and personalities and studies of its administration and the life below decks this book is the first study of the Navy in a cultural context exploring contemporary attitudes to war and peace and to ideologies of race and gender As well as literary sources Dr Lincoln draws on the vast collections of the National Maritime Museum in paintings cartoons and ceramics amongst others to focus attention on material that has hitherto been little used even research into the general culture of the late Georgian age has curiously neglected perceptions of the Navy which was one of its major institutions Individual chapters discuss the attitudes of particular groups towards the Navy merchants politicians churchmen women scientists and the seamen themselves and how these attitudes changed over the course of the period

*British Flag Officers in the French Wars, 1793-1815* John Morrow, 2018-02-22 During the French wars 1793 1801 1803 1815 the system of promotion to flag rank in the Royal Navy produced a cadre of admirals numbering more than two hundred at its peak These officers competed vigorously for a limited number of appointments at sea and for the high honours and significant financial rewards open to successful naval commanders When on active service admirals faced formidable challenges arising from the Navy's critical role in a global conflict from the extraordinary scope of their responsibilities and from intense political public and professional expectations While a great deal has been written about admirals' roles in naval operations other aspects of their professional lives have not

been explored systematically British Flag Officers in the French Wars 1793-1815 considers the professional lives of well known and more obscure admirals vice admirals and rear admirals It examines the demands of naval command flag officers understanding of their authority and their approach to exercising it their ambitions and failures their professional interactions and their lives afloat and onshore In exploring these themes it draws on a wide range of correspondence and other primary source material By taking a broad thematic approach this book provides a multi faceted account of admirals professional lives that extends beyond the insights that are found in biographical studies of individual flag officers As such it will be of great interest to students and scholars of British naval history

**The Great Anglo-Russian Naval Alliance of the Eighteenth Century and Beyond** Philip MacDougall, 2022 Examines Naval co operation between Britain and Russia and the often underappreciated prowess of the Russian navy Naval co operation between Britain and Russia continued throughout the eighteenth century with Britain providing huge assistance to the growth of Russia's navy and Russia making an essential but often overlooked contribution to Britain's maritime power in the period From 1698 when Tsar Peter the Great served briefly as a trainee shipwright at Deptford dockyard Russia recruited British often Scottish shipwrights engineers naval officers and naval surgeons who both helped build up the Russian navy and who were also key advisers to the Russian navy at sea At the same time naval stores from Russia especially after Britain lost the American colonies were vital for the maintenance of Britain's fleet Moreover as this book argues Russian naval power was much more formidable than is often realised with the Russian navy active alongside the British fleet in the North Sea and winning decisive battles against the Ottoman navy in the Mediterranean including the battles of Chesme in 1770 and Navarino in 1827 Britain did well to have Russia as a naval ally rather than an enemy This book provides a comprehensive overview of this important subject at a time when Britain's relationship with Russia is of considerable concern

Unger, 2011-03-21 Shipping was the most dynamic sector of the economy of Europe from the fourteenth into the nineteenth century Europeans who moved goods by sea dramatically improved their efficiency laying the foundations for greater economic growth to come and for domination of the world's oceans **The Coalitions Against Napoleon** William Nester, 2023-06-30 Britain alone could not hope to defeat the might of Napoleonic France which through enforced conscription had become a nation in arms But British leaders had a long history of forging alliances to counter their rivals and when revolution ravaged France in 1793 and a levée en masse raised a huge patriotic army it was through a

coalition of monarchies that French ambitions were restrained a coalition made possible by British gold and British industry When Napoleon seized the reins of power in France he too introduced conscription and once again it was a succession of British led and funded coalitions which eventually brought Napoleon to his knees During the years 1793 to 1815 the British Government formed and underwrote seven coalitions that cost Britain 1 657 854 518 as the national debt tripled from 290 000 000 to 860 000 00 Of that British subsidies to around thirty allies amounted to 65 830 228 along with staggering amounts of war supplies mass produced by British factories and shipped to allies Britain's leading role in Europe did not end with Waterloo Immediately following the Sixth Coalition and amidst the Seventh Coalition Britain constructed with the other great powers a security system of cooperation and consultation called the Concert of Europe that prevented a serious war among them for two generations Britain's power to underwrite those coalitions came from a related series of revolutions agrarian mercantile financial technological manufacturing cultural and political that developed over the proceeding century For many reasons that happened in Britain and not elsewhere Of them cultural values may be most crucial Constraints were fewer and incentives greater for enterprising Britons to invest invent buy and sell in ways that enriched themselves and their nation more than elsewhere During the eighteenth century Britain's leaders mastered a virtuous power cycle of victorious wars expanding production captured territories and markets and more income During a speech before Congress in December 1940 President Franklin D Roosevelt called on Americans to be an arsenal of democracy to aid Britain and other countries threatened by the imperialistic fascist powers Britain played exactly the same role during the Napoleonic era The Coalitions Against Napoleon explores how Britain developed and asserted the financial manufacturing and military power to achieve that goal

The Colonists' American Revolution Guy Chet, 2019-09-11 A Dissenting Companion to the U S History Textbook Most U S History textbooks track the origins and evolution of American identity They therefore present the American Revolution as the product of a gradual cultural change in English colonists Over time this process of Americanization differentiated and alienated the settlers from their compatriots and their government in Britain This widely taught narrative encourages students to view American independence as a reflection of emerging American nationhood The Colonists American Revolution introduces readers to a competing narrative which presents the Revolution as a product of the colonists English identity and of English politics This volume helps students recognize that the traditional narrative of the Revolution is an argument not a just the facts account of this period in U S history Written to make history interesting and relevant to students this textbook provides a dissenting interpretation of America's founding the Revolution was not the result of an incremental process of Americanization but rather an immediate reaction to sudden policy changes in London It exposes students to dueling historical narratives of the American Revolution encouraging them to debate and evaluate both narratives on the strength of evidence This stimulating volume Offers an account of the Revolution's chronology causes ends and accomplishments not commonly addressed in traditional textbooks Challenges the conventional narrative of Americanization

with one of Anglicization Presents the Atlantic as a bridge rather than a barrier between England and its colonies Discusses the American Revolution as one in a series of British rebellions Uses a dual perspective approach to spark discussions on what it means to study history Exposing students to two different ways of studying history The Colonists American Revolution Preserving English Liberty 1607 1783 is a thought provoking resource for undergraduate and graduate students of early American history as well as historians and interested general readers

The Myth of the Press Gang Jeremiah Ross Dancy, 2015 Overturns the generally held view that the press gang was the main means of recruiting seamen by the British navy in the late eighteenth century SHORTLISTED for the Society for Nautical Research's prestigious Anderson Medal The press gang is generally regarded as the means by which the British navy solved the problem of recruiting enough seamen in the late eighteenth century This book however based on extensive original research conducted primarily in a large number of ships muster books demonstrates that this view is false It argues that in fact the overwhelming majority of seamen in the navy were there of their own free will Taking a long view across the late eighteenth century but concentrating on the period of the French Revolutionary and Napoleonic Wars of 1793 1815 the book provides great detail on the sort of men that were recruited and the means by which they were recruited and includes a number of individuals stories It shows how manpower was a major concern for the Admiralty how the Admiralty put in place a range of recruitment methods including the quota system how it worried about depleting merchant shipping of sufficient sailors and how although most seamen were volunteers the press gang was resorted to especially during the initial mobilisation at the beginning of wars and to find certain kinds of particularly skilled seamen The book also makes comparisons with recruitment methods employed by the navies of other countries and by the British army J Ross Dancy is Assistant Professor of History at Sam Houston State University
