Representing The New Media Company:

Nominations of Pamela Harbour to be a Commissioner of the Federal Trade Commission and Nicole Nason to be Assistant Secretary for Governmental Affairs for the Department of Transportation United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2014 News Discourse Monika Bednarek, Helen Caple, 2018-10-19 Now reissued and retypeset this canonical book explores the role of language and images in newspaper radio online and television news The authors introduce useful frameworks for analysing language image and the interaction between the two and illustrate these with authentic news stories from around the English speaking world ranging from the Oktoberfest to environmental disasters to the killing of Osama bin Laden This analysis persuasively illustrates how events are retold in the news and made newsworthy through both language and image This clearly written and accessible introduction to news discourse is essential reading for students lecturers and researchers in linguistics media and journalism studies and semiotics **Virtual Society?** Steve Woolgar, 2002 Almost all aspects of social cultural economic and political life stand to be affected by the new electronic technologies Virtual Society is one vision of the consequential impact of these technologies But to what extent and in what ways are the Internet and other electronic technologies really changing our lives To what extent are we moving to a virtual society This collection provides a comprehensive set of detailed empirical studies of the genesis and use of these new technologies ranging widely across application areas from cyber cafés to new media email and organizational memory to surveillance capable technologies in the workplace virtual reality to CCTV in high rise housing stock exchange addicts to student study networks It offers a unique perspective analytic scepticism for making sense of some surprisingly counterintuitive results and for developing a refreshingly critical view of many taken for granted assumptions about the impact of the Internet on social relations and institutions Each chapter presents a high quality exemplar of its own disciplinary perspective addressed to a general social science audience The diversity of disciplinary perspectives is brought to bear in a central message laid out in the opening discussion of the Five Rules of Virtuality that with due reflexive caution and ironic sensitivity general messages can be drawn from the observations of particular substantive contexts In particular claims that we are moving to a virtual society need to be tempered by a reassessment of connections between what counts as real and virtual This book will appeal to students and researchers in a very wide range of disciplines both within and beyond the social sciences and management and to all practitioners struggling with the realities of the new virtual technologies
