Reproduction In Context Social And Environmental Influences On Reproduction:

Reproduction in Context Kim Wallen, Jill E. Schneider, 2000 Historically reproductive science has focused on reproductive behaviors divorced from the contexts in which they occur Taking a more integrated view this book explores the neuroendocrine bases of reproduction in relation to their environmental and social contexts The contributors provide compelling accounts of reproductive behaviors in animals ranging from turtles and lizards to humans and nonhuman primates They examine these behaviors from the perspectives of ethology endocrinology behavioral genetics and evolutionary ecology Together they illuminate the dynamic interplay between the ecological and social contexts of a species and the biological mechanisms regulating reproductive behavior The book shows how an appreciation of the full complexity of the context of reproduction actually simplifies and clarifies our understanding of reproductive behavior Contributors Gregory F Ball George E Bentley Franklin H Bronson David Crews Jeffrey A French Michael R Gorman Kay E Holecamp Jerry D Jacobs Sabra L Klein Theresa M Lee Donna L Maney Martha K McClintock Simone Meddle Randy J Nelson Nicole Perfito Emilie F Rissman Colleen M Schafner Patricia A Schiml Jill E Schneider Rae Silver Ann Judith Silverman Laura Smale Kira Soma Jennifer M Swann Anthony D Tramontin George N Wade Kim Wallen Scott R Wersinger John C Wingfield Ruth I Wood

Reproductive Neuroendocrinology and Social Behavior Ishwar S. Parhar, Tomoko Soga, Sonoko Ogawa, 2016-10-12 Anti social behaviors and social deficits induced mental disorders are critical problems in our society today Social behaviors and interactions are shaped by experience hereditary components genes hormones and neuropeptides and environmental factors photoperiods and metabolic signals In addition to the classical gonadotropin releasing hormone RFamide peptides kisspeptin and gonadotropin inhibiting hormone are emerging as important regulators of the reproductive axis These neuropeptides are evolutionarily conserved and are regulated by environmental factors In this Research Topic we advocate more recent advances in reproductive neuropeptides and sex steroids in the domains of social behavior including sexual and parental behavior aggression stress and anxiety Using multiple species model we also review how genes and the neuroendocrine system interact at the cell and organismic levels to contribute to social behavior in particular the epigenetic genomic changes caused by early life environment We provide comprehensive insights of distinct neural networks and how cellular and molecular events in the brain regulate social behavior from a comparative perspective **Molecular**

Mechanisms of Hormone Actions on Behavior Anne M. Etgen, Donald W. behavioral and developmental level and sexual differentiation of the development of hormone dependent neuronal systems neuropeptides neuromodulators and steroid induced neuroplasticity are addressed There is simply no other current single volume reference with such comprehensive coverage and depth Authors selected are the internationally renowned experts for the particular topics on which they write and the volume is richly illustrated with over 175 figures over 50 in color A collection of articles reviewing our fundamental knowledge of the mechanisms of neuroendocrinology the book provides an essential affordable reference for researchers clinicians and graduate students in the area The most comprehensive single volume source of up to date data on the mechanisms behind neuroendocrinology with review articles covering x y z Chapters synthesize information otherwise dispersed across a number of journal articles and book chapters thus saving researchers the time consuming process of finding and integrating this information themselves Offering outstanding scholarship each chapter is written by an expert in the topic area and approximately 35% of chapters are written by international contributors Provides more fully vetted expert knowledge than any existing work with broad appeal for the US UK and Europe accurately crediting the contributions to research in those regions Heavily illustrated with 175 figures approximately 54 in color Presents material in most visually useful form for the reader [Hormones, Brain and Behavior Online](#) ,2002-06-18

Granger, Marcus K. Taylor, 2020-04-07 This book provides the first comprehensive overview of the emerging field of interdisciplinary salivary bioscience It serves as a foundational reference guide to the collection analysis and interpretation of salivary data as well as its myriad applications in medicine surveillance and public health The ease and non invasive nature of saliva collection makes it highly useful in diverse fields such as pediatrics dentistry neuroscience

psychology animal welfare and precision medicine This book introduces students and scientists alike to the vast potential of salivary bioscience in both research and practice **The Story of V** Catherine Blackledge, 2004 It is the seat of female sexual pleasure the site of the creation of humankind and the channel for its birth Yet we know less about the vagina its structure and function than we do about any other organ of the human body Why *Chemical Signals in Vertebrates 10* R.T. Mason, Michael P. Lemaster, Dietland Müller-Schwarze, 2006-11-09 The editors and contributors to this volume should be justifiably proud of their participation in the tenth triennial meeting of the Chemical Signals in Vertebrates International Symposium This meeting was held 27 years after the initial gathering of participants in Saratoga Springs New York from June 6 to 9 1976 Subsequent meetings have been held every three years in Syracuse New York Sarasota Florida Laramie Wyoming Oxford England Philadelphia Pennsylvania Tübingen Germany Ithaca New York and Krakow Poland This tenth anniversary symposium was held from July 29 through August 1 in Corvallis Oregon and was hosted by the Zoology Department and Biology Programs of Oregon State University This book also represents the tenth in a series of books on chemical communication chemical ecology olfactory and vomeronasal research in vertebrate species The species covered in the chapters herein range from fish to mammals including humans By taxonomic breakdown the mammals are the most represented in number of species and chapter contributions However the hosts of the meeting endeavored to have some representative contributions covering all of the major vertebrate taxa As in past years the meeting was well represented with just over 100 participants from 13 different nations Plenary talks focused on some of the non mammalian groups that have tended to be less represented in these symposia Thus we had a very nice overview of comparisons and contrasts of invertebrate chemical communication to vertebrate systems *The Tangled Wing* Melvin Konner, 2003-02 A vital updating of a seminal work of science First published to great acclaim twenty years ago *The Tangled Wing* has become required reading for anyone interested in the biological roots of human behavior Since then revolutions have taken place in genetics molecular biology and neuroscience All of these innovations have been brought into account in this greatly expanded edition of a book originally called an overwhelming achievement by The Times Literary Supplement A masterful synthesis of biology psychology anthropology and philosophy *The Tangled Wing* reveals human identity and activity to be an intricately woven fabric of innumerable factors Melvin Konner's sensitive and straightforward discussion ranges across topics such as the roots of aggression the basis of attachment and desire the differences between the sexes and the foundations of mental illness

Neuroplasticity, Development, and Steroid Hormone Action Robert J. Handa, Shinji Hayashi, Ei Terasawa, Mitsuhiro Kawata, 2001-07-30 A compilation of cutting edge research *Neuroplasticity Development and Steroid Hormone Action* explores the effects of steroid hormones on brain development function and aging The experimental approaches used by the authors range from molecular to behavioral and endocrine to neurobiological It contains scientific photographs line drawings tables color illustrations and graphs this interesting and timely text covers the neuroplastic effects of steroid

hormones throughout the lifetime of various animal models such as bees fish lizards turtles birds mice rats and primates

Orangutans Serge A. Wich,uci Suci Utami Atmoko,Tatang Mitra Setia,Carel P. van Schaik,2010-01-07 This book describes one of our closest relatives the orangutan and the only extant great ape in Asia It is increasingly clear that orangutan populations show extensive variation in behavioural ecology morphology life history and genes Indeed on the strength of the latest genetic and morphological evidence it has been proposed that orangutans actually constitute two species which diverged more than a million years ago one on the island of Sumatra the other on Borneo with the latter comprising three subspecies This book has two main aims The first is to carefully compare data from every orangutan research site examining the differences and similarities between orangutan species subspecies and populations The second is to develop a theoretical framework in which these differences and similarities can be explained To achieve these goals the editors have assembled the world s leading orangutan experts to rigorously synthesize and compare the data quantify the similarities or differences and seek to explain them *Orangutans* is the first synthesis of orangutan biology to adopt this novel comparative approach It analyses and compares the latest data developing a theoretical framework to explain morphological life history and behavioural variation Intriguingly not all behavioural differences can be attributed to ecological variation between and within the two islands relative rates of social learning also appear to have been influential The book also emphasizes the crucial impact of human settlement on orangutans and looks ahead to the future prospects for the survival of critically endangered natural populations

Functional Avian Endocrinology Alistair Dawson,P. J. Sharp,2005 Provides a review of the research into all aspects relating to hormones in birds wild birds how they respond and adapt to their natural environment and domestic poultry aimed at improving commercial production and breeding This book illustrates the way this technology is being used to open up new opportunities for avian endocrinologists

Behavioural Ecotoxicology Giacomo Dell'Omo,2002-05-22 Behavioural ecotoxicology is an emerging field dealing with the effects of environmental pollutants on the behaviour of animals Behavioural techniques derived from experimental psychology behavioural pharmacology and neurotoxicology are applied to detect and characterise changes in animals living in the environment exposed to various pollutants Behavioural effects are then interpreted in an ecological context considering the long term relevance of these changes at both the individual and population level

Evolutionary Psychology and Motivation Jeffrey A. French,Alan C. Kamil,Daniel W. Leger,Martin Daly,2001-01-01 Recent media coverage of the controversial theory of sexual violence as a product of biological evolution has once again brought the question of the origins of human motivation into the public eye In this volume leading scholars in behavioral studies examine the value of evolutionary perspectives in understanding psychological motivations Beginning with the fundamental fact that humans are part of the biological world evolutionary psychologists contend that human motivations and mental processes should be understood as by products of natural selection By viewing human psychology both normal and abnormal within this framework evolutionary psychologists intend

to bridge the disciplinary divide between traditional psychology and fields such as biology

Rauw, 2009 This book is about resource allocation matters with the aim to further development thoughts and models on resource allocation applied to livestock production It contains 18 chapters divided into 4 parts which discuss resources and resource allocation patterns trade offs metabolic constraints to resource allocation and the process of homeorhesis with a special emphasis to homeorhesis during heat stress the relationship between food intake and resources allocated to body maintenance growth reproduction and the immune response the consequences of high production efficiency in pigs poultry and dairy cattle and the consequences of improved production by means of biological engineering and options to include resource allocation matters in the breeding objective animal welfare and in resource allocation modelling

Hormonal Therapy for Male Sexual Dysfunction Mario Maggi, 2012-01-30 Hormonal therapy offers a potentially powerful approach to the treatment of sexual disorders in men However the interplay of different hormones within different bodily systems is carefully balanced judicious judgement is required in the therapeutic use of hormones to minimize unwelcome side effects A better understanding of how hormones work will help the physician to better tailor therapies for improved sexual responses in men Hormonal Therapy for Male Sexual Dysfunction will provide the rationale for hormonal therapy in male sexual disorders explaining the language of sexual endocrinology and its application in clinical practice The aim of this book is to provide a clinical in the office or at the bedside guide to effective patient care for sexual medicine physicians urologists gynecologists and other health care providers in practice and in training The tone will be practical not academic The working assumption is that readers want to know what and what not might or should be done without over emphasis on the why That said it is important to review the crucial basic science necessary for effective diagnosis and management and to provide reminders in the context of the practical chapters It will not be heavily referenced in line with a more practical approach This allows for smoother reading and also relieves the

burden of comprehensive citing from authors Key evidence clinical trials Cochrane or other meta analyses should be summarized in Evidence at a Glance boxes and key references such as reviews major papers can be provided in the selected bibliography at the end of each chapter Practical guidance will be provided through the use of algorithms and guidelines where they are appropriate Tips and Tricks boxes hints on improving outcomes perhaps via practical technique patient questioning etc Caution warning boxes hints on avoiding problems perhaps via contraindications Science Revisited quick reminder of the basic science principles necessary for understanding *Fertility and Sterility: A Current Overview* J.
