Davis,2006 The second edition of The Disability Studies Reader builds and improves upon the classic first edition which has sold well over 6000 copies since 1999 As a field disability studies burst onto the scene across the social sciences and humanities in the 1990s and the first edition of the reader gathered the best work that had been written on the subject including essays by famous authors such as Susan Sontag and Erving Goffman The new edition is more global in its coverage and adds material on genetic testing the human genome queer studies and issues in developing countries The size of the

audience has grown since the first edition's publication and the second edition's new material will make it even more useful for courses on the subject. Courses on the subject have mushroomed in the past ten years and can now be found across the social sciences, humanities, and behavioral sciences.

Women's Health Movements M. Turshen, 2007-09-17 This is an introduction to the women's health movements and what is being accomplished by women organizing to achieve better health care around the world.

Routledge Handbook of Global Health Rights Clayton Ó Néill, Charles Foster, Jonathan Herring, John Tingle, 2021-05-30 This book examines the idea of a fundamental entitlement to health and healthcare from a human rights perspective. The volume is based on a particular conceptual reasoning that balances critical thinking and pragmatism in the context of a universal right to health. Thus the primary focus of the book is the relationship or contrast between rights-based discourse, jurisprudential arguments, and real-life healthcare contexts. The work sets out the constraints that are imposed on a universal right to health by practical realities such as economic hardship, in countries' lack of appropriate governance, and lack of support for the implementation of this right through appropriate resource allocation. It queries the degree to which the existence of this legally enshrined right and its application in instruments such as the International Covenant on Economic, Social and Cultural Rights (ICESCR) and the Universal Declaration of Human Rights (UDHR) can be more than an ephemeral aspiration but can actually sustain, promote, and instill good practice. It further asks if social reality and the inequalities that present themselves therein impede the implementation of laudable human rights, particularly within marginalised communities and cadres of people. It deliberates on what states and global bodies do or could do in practical terms to ensure that such rights are moved beyond the aspirational and become attainable and implementable. Divided into three parts, the first analyses the notion of a universal, inalienable right to health care from jurisprudential, anthropological, legal, and ethical perspectives. The second part considers the translation of international human rights norms into specific jurisdictional healthcare contexts. With a global perspective, it includes countries with very different legal, economic, and social contexts. Finally, the third part summarises the lessons learnt and provides a pathway for future action. The book will be an invaluable resource for students, academics, and policymakers working in the areas of health law and policy and international human rights law.
