Normandy On July 25 U S divisions under Gen Omar Bradley launched Operation Cobra an attempt to break out of the hedgerows and begin a war of movement across France Despite a disastrous start with misdropped bombs killing hundreds of GIs Cobra proved to be one of the most pivotal battles of World War II successfully breaking the stalemate in Normandy and clearing a path into occupied France

**Rhino Tanks and Sticky Bombs** Robert P. Wettemann,2025-06-10 Coming of age during the Great Depression the American boys who fought in World War II had through necessity developed a unique brand of technological resourcefulness This proficiency Robert P Wettemann Jr contends provided GIs with another weapon in a distinctly American way of war Rhino Tanks and Sticky Bombs is Wettemann s eminently readable account of how this hard won use it up wear it out make it do or do without mentality was critical to America s success giving servicemen the know how and can do spirit to creatively engineer solutions to wartime problems More than all the other soldiers in the conflict American servicemen grew up in a society where the machine was ubiquitous where enduring an unparalleled period of financial distress meant learning to keep their Model Ts Fordson tractors or other machinery operational Wettemann describes how this tinkerer s mentality promoted a technical aptitude and willingness to adapt unmatched by other armies fielded during World War II At the same time the US command structure demonstrated a willingness to evaluate accept and employ such efforts to improve both fighting capacity and the general comfort of US servicemen Seamlessly blending social military intellectual and technological history Rhino Tanks and Sticky Bombs weaves an engaging narrative about the roots of American ingenuity during World War II and makes a compelling case for a specific instance of American distinctiveness that proved crucial to Allied victory

**P-47 Thunderbolt vs German Flak Defenses** Jonathan Bernstein,2021-10-28 Since the end of World War 2 the tactical air war over Europe has been largely overlooked by historians and authors alike in favour of analysis of the higher profile strategic bombing campaign Involving just as many aircraft as the daylight heavy bombing campaign the fighter bombers principally of the Ninth Air Force wreaked considerably more havoc on German ground forces Indeed Thunderbolt units undertaking such missions effectively complemented the strategic campaign ensuring the defeat of Nazi Germany P 47 pilots paid a high price to achieve this victory however as the German flak arm was well equipped nearly a quarter of all war related production was devoted to anti aircraft weaponry with weapons of various calibres to counter tactical air power s low to medium altitude threat The USAAF four numbered air forces that saw action over the European continent suffered significant fighter bomber

losses to flak The principle fighter bomber from the summer of 1944 through to VE Day was the P 47D with both dedicated ground attack units and squadrons that had completed their bomber escort tasking seeking out targets of opportunity across occupied Western Europe While heavy calibre anti aircraft fire was intended to both shoot down enemy aircraft and force bombers to drop their ordnance sooner or from higher altitudes thus reducing bombing accuracy low altitude flak batteries put up a virtual wall of steel for enemy fighter bombers to fly through Damaging a low flying fighter bomber made it easier for other flak gunners to track engage and destroy it Innovations like lead computing gunsights gave gunners a higher probability of intercepting low altitude fighters Conversely the appearance of air to ground rockets beneath the wings of P 47s gave pilots better standoff range and a harder hitting punch when dealing with low and medium altitude flak units This volume analyses the tactics and techniques used by both P 47 fighter bomber pilots and German flak gunners featuring full colour illustrations to examine the Allied tactical air power in Europe from 1943 and how German defences were

overpowered by the air threat **United States Army in World War II: Pictorial Record** United States. Department of the Army. Office of Military History,1951 *American Book Publishing Record Cumulative 1998* R R Bowker

Publishing,1999-03 **United States Army in World War II.** ,1951 [P-47 Thunderbolt Units of the Twelfth Air Force](#) Jonathan Bernstein,2012-08-20 The P 47 Thunderbolt originally designed as a high altitude interceptor became the principal US fighter bomber of World War II First adapted to the ground attack role by units of the Twelfth Air Force in early 1944 the strength and durability of the P 47 airframe along with its massive size earned it the nickname Juggernaut which was quickly shortened to Jug throughout the MTO and ETO By October 1943 with the creation of the Fifteenth Air Force nearly half of the Twelfth s fighter groups would be retasked with strategic escort missions leaving six groups to perform close air support and interdiction missions throughout the entire Mediterranean theatre The groups inflicted incredible damage on the enemy s transport routes in particular using rockets bombs napalm and machine gun rounds to down bridges blow up tunnels and strafe trains Myriad first hand accounts and period photography reveal the spectacular success enjoyed by the Thunderbolt in the MTO in the final year of the war **P-51B Mustang** James William "Bill" Marshall,Lowell F. Ford,2020-07-09 The story of the P 51B Mustang aircraft from its development prior to the American entry into the war through to D Day in June 1944 During World War II the United States Army Air Corps was led by a cadre of officers who believed implicitly that military aviation particularly fast heavy bombers at high altitude would be able to destroy strategic enemy targets during daylight with minimal losses However by 1942 the Flying Fortress was proving vulnerable to Luftwaffe fighters This title charts the United States Army Air Force s struggle to develop a Long Range Escort which would enable them to achieve the Combined Bomber Objectives and gain mastery of the skies over the Third Reich The commitment of the USAAF to the Mediterranean and European theatres saw an increasingly desperate need to find a fighter escort which reached crisis point in 1943 as losses suffered in the Tidal Wave offensive and Schweinfurt Regensburg Munster raids emphasised the mounting

strength of the Luftwaffe The USAAF leaders increasingly accepted the probability of bomber losses and the deployment of the P 51B Mustang solved the problem of Germany's layered defence strategy as Luftwaffe fighters had been avoiding the P 47 Thunderbolt and P 38 Lightning escort fighters by concentrating their attacks beyond the range of the Thunderbolt and Lightning The P 51B duly emerged as the The Bastard Stepchild that the USAAF Material Division did not want becoming the key Long Range Escort fighter alongside the P 38 and P 47 that defeated the Luftwaffe prior to D Day As well as the P 51B's history this title explores the technical improvements made to each of these fighters as well as the operational leadership and technical development of the Luftwaffe they fought against
