Reputation And Representation In Fifteenth Century Europe The Northern World Ser Vol 8:

Lavradoras de Vênus Danielle de Oliveira dos Santos-Silva, 2024-08-16 Este livro oferece um estudo comparativo profundo entre duas rainhas cujas vidas apresentam coincidências mas seguiram caminhos distintos. Através de uma metódica análise das crônicas medievais e estudos biográficos a autora explora o impacto da influência feminina como uma potencial fonte de poder de acordo com o conceito de Queenship. Elizabeth Woodville da Inglaterra e Leonor Teles de Menezes de Portugal foram rainhas não convencionais, mulheres da nobreza que já haviam sido casadas e meses antes de ascenderem ao trono, desafiando as expectativas de princesas jovens e estrategicamente vantajosas. O favor real e o desejo do rei que as escolheu como consorte desestabilizou o delicado equilíbrio entre o trono e a nobreza, promovendo mudanças significativas em seus reinos. Este estudo busca entender como essas dinâmicas geraram períodos de agitação e transformação tanto em Portugal quanto na Inglaterra, revelando um capítulo fascinante e pouco explorado da história medieval.

Demography Representation Delimitation: The North - South Divide in India Ravi K. Mishra, AN EXTREMELY TOPICAL BOOK AND THE FIRST OF ITS KIND ON DELIMITATION WHICH IS TO BE CARRIED OUT AFTER THE 2026 CENSUS. The popular narrative around delimitation is that south India controlled its population growth through effective family planning while the north did not. Therefore the argument goes delimitation expected to take place after the Census is conducted in 2026 would penalise the south for performing well. In this compelling and data driven analysis Ravi K Mishra, a scholar of modern Indian history and Joint Director of the Prime Ministers Museum and Library questions this belief. Drawing on 150 years of comprehensive data from decennial censuses, district gazetteers, boundary commission reports and state reorganisation legislations, Mishra reveals that all regions of India have experienced phases of peak population growth though at different times. He argues that there is little causal connection between family planning and population control in India when family planning assumed importance in the 1960s under the flawed Western notion of population explosion, most southern states had already grown rapidly for ninety years and almost completed their demographic transition leading to a gradual decline in growth thereafter. Meanwhile trailing the south by decades, the north had only then entered the peak growth phase and the north and west are currently underrepresented, disrupting the one person, one vote, one value principle. Tackling myths about demography and delimitation head on, *Demography Representation Delimitation* is an essential read on a complex and widely misunderstood subject.

Gunpowder, Explosives and the State Brenda J. Buchanan, 2016-12-05 Gunpowder studies are still in their infancy despite the long standing civil and military importance of this explosive since its discovery in China in the mid ninth century AD In this second volume by contributors who meet regularly at symposia of the International Committee for the History of

Technology ICOHTEC the research is again rooted in the investigation of the technology of explosives manufacture but the fact that the chapters range in scope from the Old World to the New from sources of raw materials in south east Asia to the complications of manufacture in the West shows that the story is more than the simple one of how an intriguing product was made This volume is the first to develop the implications of the subject not just in the sense of relating it to changing military technologies but in that of seeing the securing of gunpowder supplies as fundamental to the power of the state and imperial pretensions The search for saltpetre for example an essential ingredient of gunpowder became a powerful engine of sea going European trade from the early seventeenth century Smaller states like Venice were unable to form these distant connections and so to sustain a gunpowder army Stronger states like France and Britain were able to do so and became even more powerful as the demand for improved explosives fostered national strengths leading to a development of the sciences especially chemistry in the former case and of manufacturing techniques in the latter

Suspect Relations Kirsten Fischer,2002 Over the course of the eighteenth century race came to seem as corporeal as sex Kirsten Fischer has mined unpublished court records and travel literature from colonial North Carolina to reveal how early notions of racial difference were shaped by illicit sexual relationships and the sanctions imposed on those who conducted them Fischer shows how the personal and yet often very public sexual lives of Native American African American and European American women and men contributed to the new racial order in this developing slave

society Liaisons between European men and native women among white and black servants and between servants and masters as well as sexual slander among whites and acts of sexualized violence against slaves were debated denied and recorded in the courtrooms of colonial North Carolina Indentured servants slaves Cherokee and Catawba women and other members of less privileged groups sometimes resisted colonial norms making sexual choices that irritated neighbors juries and magistrates and resulted in legal penalties and other acts of retribution The sexual practices of ordinary people vividly bring to light the little known but significant ways in which notions of racial difference were alternately contested and affirmed before the American Revolution Fischer makes an innovative contribution to the history of race class and gender in early America by uncovering a detailed record of illicit sexual exchanges in colonial North Carolina and showing how acts of resistance to sexual rules complicated ideas about inherent racial difference *Black Marxism* Cedric J.
