RICHARD J. EVANS

Rereading German History

**Richard John Evans (historien
spécialiste de l'Allemagne).)**

Rereading German History:

Rereading German History Richard J. Evans, 1997 Presenting the collected reviews of one of modern Germany's single most important historians this book offers a comprehensive summary of Richard Evans' trenchant and important analytical points on Weimar the Third Reich and revisionism

Rereading German History (Routledge Revivals), 2015

Rereading German History Richard John Evans (historien spécialiste de l'Allemagne), 1997

Rereading German History Richard Evans, 2002-11-01 In this text the author draws together his review essays on the political economic cultural and social history of Germany through war and reunification This book provides a study of how historians mainly German American British and French have provided a series of differing and often conflicting readings of the German past in recent years It also presents a reconsideration of German history in the light of the recent decline and fall of the German Democratic Republic collapse of the Berlin Wall and the reunification of Germany

Rewriting German History Jan Rüger, Nikolaus Wachsmann, 2015-10-11 Rewriting German History offers striking new insights into key debates about the recent German past Bringing together cutting edge research and current discussions this volume examines developments in the writing of the German past since the Second World War and suggests new directions for scholarship in the twenty first century

Rereading Monika Maron Deirdre Byrnes, 2011 This book provides a comprehensive analysis of the writing of Monika Maron Her biography charts a complex relationship with the GDR state from initial ideological identification to sustained radical rejection Situating its reflections on her work against the backdrop of a changing critical landscape this analysis takes account of the re contextualisation of her writing necessitated by the collapse of the GDR The author charts the development of a number of seminal themes in Maron's oeuvre The search for an authentic form of expression in her earliest texts gave way to a focus on the writing and the rewriting of history The demise of the political system in 1989 led to an exploration in her work of more intimate themes Maron's post Wende writing makes an important East German contribution to debates on memory transmission and generational forgetting Her most recent novels are concerned with the rupture and the ultimate refashioning of biographies in a post GDR age Rereading her texts in a post Wende light the author explores the complexity of Maron's relationship with the state from which she emerged and demonstrates how this complexity manifests itself in her writing before and after 1989 This study offers new perspectives on Maron's work and illuminates the

significance of her contribution to contemporary German literature

Builders of the Third Reich Charles Dick, 2020-11-12 This is the first comprehensive critical study of the Organisation Todt OT a key institution which oversaw the Third Reich's vast slave labour programme together with the SS Wehrmacht and industry The book breaks new ground by revealing the full extent of the organisation's brutal and murderous operations across occupied Europe and in the Reich For the first time Charles Dick provides a strong voice for camp survivors overseen by the OT drawing on an extensive collection of personal accounts and analysing the violence they endured Builders of the Third Reich shows Hitler used the OT

which had a labour force of around 15 million people in 1944 as an instrument of subjugation and occupation to project German imperial power Drawing on a broad range of primary sources it demonstrates how the organisation participated in the plunder of Europe's raw materials and manpower greatly boosting the German war economy The book reveals how OT staff shot beat or worked tens of thousands of prisoners to death both within the SS run concentration camp system and outside it with analysis of OT operations showing that where it had sole or very high levels of control over camps prisoner death rates were extremely high Examining how engineers and builders individuals who fitted the category of ordinary men as precisely as any other group so far examined by historians perpetrated war crimes this volume reflects on how few OT personnel were interrogated or came to trial and how the organisation passed largely under the radar of post war prosecutors researchers and the general public

Modern Germany Charles River Editors, 2025-05-01

The history of Germany and the German speaking peoples is as complex and multifaceted as any in Europe It is also one of the most difficult to pinpoint conceptually and historically since every nation is a construct to some extent Language is certainly important and the German language is a unifying factor for any notion of a unified Germany yet even today many German speakers live outside the borders of modern Germany Shared customs and traditions gave Germans a common sense of identity to some extent but these were often local in origin Germans were also split between several versions of Christianity Nevertheless ideas of a German nation were present by the 19th century leading up to the official unification in 1871 Neil MacGregor a historian of modern Germany has explained that the two defining events leading to the rise of German nationalism and the movement toward unification were the Thirty Years War and the Napoleonic Wars

- 1 During the Thirty Years War more than 200 German states were part of the Holy Roman Empire's loose confederation and that war was predominantly fought in German states by foreign powers including France Sweden Denmark Austria and the Netherlands MacGregor noted that horrors were experienced across all Germany and were never forgotten to the extent that they were invoked during World War II
- 2 The religious basis of the Thirty Years War saw the split between Catholicism and Protestantism which was at the heart of the Reformation Some foreign leaders even invoked defending German freedoms for their invasion
- 3 From the German point of view the Thirty Years War was proof of their vulnerability to foreign aggression Atrocities such as the sacking of Magdeburg in 1631 where more than 30 000 people were killed were embedded in the German consciousness
- 4 All told 8 million people died during the Thirty Years War Likewise the Napoleonic Wars fought about 150 years later appeared to confirm these fears The French Revolution had terrified similar royal regimes in other European empires and as the revolution took on ever bloodier connotations other countries were drawn into conflict with the new French Republic with the Holy Roman Empire on the front line of the revolutionary wars Napoleon Bonaparte earned his reputation with a number of victories on the battlefield and rose to the pinnacle of power in France As the French emperor his reign was characterized by a more aggressive military strategy and the rapid annexation of much of Europe

Tales from the German Underworld

Richard J. Evans, Professor of European History Richard J Evans, Richard J.. Evans, 1998-01-01 Through the means of four powerful and extraordinary narratives from the 19th century German underworld this book deftly explores an intriguing array of questions about criminality punishment and social exclusion in modern German history Drawing on legal documents and police files historian Richard Evans dramatizes the case histories of four alleged felons to shed light on German penal policy of the time 25 illustrations 21st-Century Narratives of World History R. Charles Weller, 2017-11-06 This book makes a unique and timely contribution to world global historical studies and related fields It places essential world historical frameworks by top scholars in the field today in clear direct relation to and conversation with one other offering them opportunity to enrich elucidate and at times challenge one another It thereby aims to 1 offer world historians opportunity to critically reflect upon and refine their essential interpretational frameworks 2 facilitate more effective and nuanced teaching and learning in and beyond the classroom 3 provide accessible world historical contexts for specialized areas of historical as well as other fields of research in the humanities social sciences and sciences and 4 promote comparative historiographical critique which helps identify continuing research questions for the field of world history in particular as well as b further global peace and dialogue in relation to varying views of our ever increasingly interconnected interdependent multicultural and globalized world and its shared though diverse and sometimes contested history **HOLOCAUST ANGST** Jacob S. Eder, 2016-07-01 In the face of an outpouring of research on Holocaust history Holocaust Angst takes an innovative approach It explores how Germans perceived and reacted to how Americans publicly commemorated the Holocaust It argues that a network of mostly conservative West German officials and their associates in private organizations and foundations with Chancellor Kohl located at its center perceived themselves as the victims of the afterlife of the Holocaust in America They were concerned that public manifestations of Holocaust memory such as museums monuments and movies could severely damage the Federal Republic's reputation and even cause Americans to question the Federal Republic's status as an ally From their perspective American Holocaust memorial culture constituted a stumbling block for West German American relations since the late 1970s Providing the first comprehensive archival study of German efforts to cope with the Nazi past vis vis the United States up to the 1990s this book uncovers the fears of German officials some of whom were former Nazis or World War II veterans about the impact of Holocaust memory on the reputation of the Federal Republic and reveals their at times negative perceptions of American Jews Focusing on a variety of fields of interaction ranging from the diplomatic to the scholarly and public spheres the book unearths the complicated and often contradictory process of managing the legacies of genocide on an international stage West German decision makers realized that American Holocaust memory was not an anti German plot by American Jews and acknowledged that they could not significantly change American Holocaust discourse In the end German confrontation with American Holocaust memory contributed to a more open engagement on the part of the West German government with this memory and eventually rendered it a positive resource for German self representation

abroad Holocaust Angst offers new perspectives on postwar Germany's place in the world system as well as the Holocaust culture in the United States and the role of transnational organizations In Defence of History Richard J. Evans, 2012-11-01

A lucid muscular and often sly reflection on the worth and purpose of historical scholarship by the award winning author of *The Third Reich Trilogy* Kirkus In this volume the renowned historian Richard J Evans offers a fervent and deeply insightful defense of his craft and its importance to civilization At a time when fact and historical truth are under unprecedented assault Evans shows us why history is necessary Taking us into the historians workshop he offers a firsthand look at how good history gets written In staunch opposition to the wilder claims of postmodern historians Evans thoroughly dismantles the notion that a realistic grasp of history is impossible to attain He then goes on to explain the deadly political dangers of losing a historical perspective on the way we live our lives In the tradition of E H Carr's *What Is History* and G R Elton's *The Practice of History* Evans *In Defense of History* delivers a model of lucid and intelligent historiographical analysis *The Guardian* UK In Defense of History Richard J. Evans, 2000-01-17

A master practitioner gives us an entertaining tour of the historian's workshop and a spirited defense of the search for historical truth E H Carr's *What Is History* a classic introduction to the field may now give way to a worthy successor In his compact intriguing survey Richard J Evans shows us how historians manage to extract meaning from the recalcitrant past To materials that are frustratingly meager or overwhelmingly profuse they bring an array of tools that range from agreed upon rules of documentation and powerful computer models to the skilled investigator's sudden insight all employed with the aim of reconstructing a verifiable usable past Evans defends this commitment to historical knowledge from the attacks of postmodernist critics who see all judgments as subjective Evans brings a remarkable range a nose for the archives a taste for controversy and a fluent pen *The New Republic* to this splendid work Essential reading for coming generations Keith Thomas **Red Saxony** James Retallack, 2017-04-14

Red Saxony throws new light on the reciprocal relationship between political modernization and authoritarianism in Germany over the span of six decades Election battles were fought so fiercely in Imperial Germany because they reflected two kinds of democratization Social democratization could not be stopped but political democratization was opposed by many members of the German bourgeoisie Frightened by the electoral success of the Social Democrats after 1871 anti democrats deployed many strategies that flew in the face of electoral fairness They battled socialists liberals and Jews at election time but they also strove to rewrite the electoral rules of the game Using a regional lens to rethink older assumptions about Germany's changing political culture this volume focuses as much on contemporary Germans' perceptions of electoral fairness as on their experiences of voting It devotes special attention to various semi democratic voting systems whereby a general and equal suffrage for the Reichstag was combined with limited and unequal ones for local and regional parliaments For the first time democratization at all three tiers of governance and their reciprocal effects are considered together Although the bourgeois face of German authoritarianism was nowhere more evident than in

the Kingdom of Saxony Red Saxony illustrates how other Germans grew to fear the spectre of democracy Certainly twists and turns lay ahead yet that fear made it easier for Hitler and the Nazis to win elections in the 1920s and to entomb German democracy in 1933

Ottoman Imperial Diplomacy Dogan Gurpinar, 2013-10-25 The Ottoman Empire maintained a complex and powerful bureaucratic system which enforced the Sultan's authority across the Empire's Middle Eastern territories This bureaucracy continued to gain in power and prestige even as the empire itself began to crumble at the end of the nineteenth century Through extensive new research in the Ottoman archives Dogan Gurpinar assesses the intellectual cultural and ideological foundations of the diplomatic service under Sultan Abdulhamid II In doing so Ottoman Imperial Diplomacy presents a new model for understanding the formation of the modern Turkish nation arguing that these Hamidian reforms undertaken with the support of the Young Ottomans led by Namik Kemal constituted the beginnings of modern Turkish nationalism This book will be essential reading for historians of the Ottoman Empire and for those seeking to understand the history of Modern Turkey

Germany's other modernity Leif Jerram, 2018-09-30 This book is about what it meant to build a city in Germany at the turn of the twentieth century It explores the physical spaces and mental attitudes that shaped lives restructured society and conditioned beliefs about the past and expectations for the future in the crucial German generations that formed the young Reich fought the Great War and experienced the Weimar Republic Focusing on ordinary buildings and the way they shaped ordinary lives this study shows how material space could influence the lives of citizens from the ways the elderly slept at night to the economy of the city as a whole It also shows how we integrate the spaces and places of our lives into our explanations of politics culture and economics It is aimed at those who want to understand urban modernity Wilhelmine and Weimar Germany the use of space in social policy and politics and the design of cities

German Colonial Wars and the Context of Military Violence Susanne Kuss, 2017-03-27 Some historians have traced a line from Germany's atrocities in its colonial wars to those committed by the Nazis during WWII Susanne Kuss dismantles these claims rejecting the notion that a distinctive military ethos or policy of genocide guided Germany's conduct of operations in Africa and China despite acts of unquestionable brutality

The Third Reich Martin Kitchen, 2014-01-14 The twelve years of the Third Reich casts a dark shadow over history Fierce debates still rage over many of the hows whys and wherefores of this perplexing period Leading expert on German history Martin Kitchen provides a concise accessible and provocative account of Nazi Germany It takes into account the political social economic and cultural ramifications and sets it within the context of the times while pointing out those areas that still defy our understanding This lively account addresses major issues such as the reasons for Hitler's extraordinary popularity his hold over the German people even when all seemed lost the role of ideology the cooption of the elites and the descent into war for race and space culminating in the horrors of the holocaust

Helmut Kohl's Quest for Normality Christian Wicke, 2015-02-01 During his political career Helmut Kohl used his own life story to promote a normalization of German nationalism and to overcome the stigma of the Nazi period In the context of the cold war

and the memory of the fascist past he was able to exploit the combination of his religious generational regional and educational he has a PhD in History experiences by connecting nationalist ideas to particular biographical narratives Kohl presented himself as the embodiment of normality a de radicalized German nationalism which was intended to eclipse any anti Western and post national peculiarities This book takes a biographical approach to the study of nationalism by examining its manifestation in Helmut Kohl and the way he historicized Germany's past

Networks of Modernity Jean-Michel Johnston, 2021 Networks of Modernity Germany in the Age of the Telegraph 1830 1880 investigates the origins and impact of the communications revolution in nineteenth century Germany focusing on one of the most transformative technologies of the period the electric telegraph
