Darwin and International Relations Bradley A. Thayer, 2021-03-17 Shows a mastery of research and theory in both biology and international relations and weaves the two fields together in a compelling fashion Dr Steven A Peterson Director School of Public Affairs Penn State Pathbreaking and controversial Darwin and International Relations offers the first comprehensive analysis of international affairs of state through the lens of evolutionary theory Using ethnological and statistical studies of warfare among tribal societies Bradley A Thayer argues that humans wage war for reasons predicted by evolutionary theory to gain and protect vital resources but also for the physically and emotionally stimulating effects of combat Thayer demonstrates that an evolutionary understanding of disease will become a more important part of the study of international relations as new strains of diseases emerge and advances in genetics make biological warfare a more effective weapon for states and terrorists He also explains the deep causes of ethnic conflict by illuminating how xenophobia and ethnocentrism evolved in humans He notes that these behaviors once contributed to our ancestors success in radically different environments but they remain a part of us Darwin and International Relations makes a major contribution to our understanding of human history and the future of international relations Obligatory reading for social and life scientists alike and deserves to become a standard work in political science International History Review A thoughtful book that can challenge some of our comfortable assumptions Journal of Military History Outstanding This book will become a standard work in political science Roger D Masters Dartmouth College

transcendental ideal but are rather immanent to the material conditions of global interdependence But to what extent do emerging definitions of cosmopolitanism contribute to new representative democratic models of governance The present volume argues that a radical transformation of cosmopolitanism is already ongoing and that more effort is needed to take stock of transformations which are both necessary and possible To this end After Cosmopolitanism calls for an understanding of cosmopolitanism that is more attentive to the material reality of our social and political situation and less focused on linguistic analyses of its metaphorical implications It is the call for a cosmopolitanism that is also a cosmopolitics
