Our International Education Sherry Marx, Monica Housen, Christine Tapu, 2015-12-17 What makes a person pack up and move to another country What does she or he hope to gain from the experience How do children fit into the picture Our International Education presents the stories of three American women a university professor a high school math teacher and a high school English as a second language teacher who move to Hungary for a year to teach Each woman brings her young children and enrolls them in local Hungarian public schools though none of them speak Hungarian at the beginning of the experience The

autoethnographic stories that make up *Our International Education* weave together the personal and professional dimensions of life abroad illuminating not only the realities of negotiating work school and family life in another country but also the complexities of cultural adjustment and second language acquisition First person storytelling makes this book a compelling read for those considering a move abroad with their family and an excellent supplemental narrative for those studying second language acquisition acculturation autoethnography and international education These interconnected stories of three women and their children living in Hungary offer an alternately uplifting and heartrending look at what families face when overseas The co authors present a deeply personal and vivid account of their bold adventure from the initial thrill to the gradual revelation that life abroad is not always the carefree romp that some might perceive *Our International Education* masterfully demonstrates the unequivocal impact of cross cultural understanding Eleni Kounalakis United States Ambassador to Hungary 2010 2013 and author of *Madam Ambassador Three Years of Diplomacy Dinner Parties and Democracy in Budapest* Implementing a Comprehensive Research Compliance Program Aurali Dade, Lori Olafson, Suzan M. DiBella, 2015-07-01 The senior research compliance administrator has emerged as a critically important position as universities and other research organizations face an increasingly intricate regulatory environment These administrators are tasked with a special challenge ensuring that their institutions conduct safe ethical and compliant research while also helping researchers understand and meet compliance requirements and achieve their research goals These competing responsibilities can make the role of the research administrator complex however those who serve in this role may find that they have limited preparation for the challenges and little or no formal education in the field Thus the goal of this handbook is to provide practical guidance to research administrators who are responsible for a wide variety of compliance programs Previous volumes on these topics have focused primarily on educating research faculty staff and students An assumption in many of these handbooks is that all additional questions related to research ethics and regulations should be directed to the senior research administrator yet the books have limited guidance intended for the senior research administrators themselves This handbook is designed therefore to serve as a detailed program implementation manual for these administrators who are expected to be conversant on a broad range of complex ethical and regulatory topics and to provide guidance to those conducting research as well as upper administration and others interested in safe ethical and compliant research **Digital Reference Services in Academic Libraries** Ab.
