Erickson, Diane M. Riley, Yuet W. Cheung, Pat A. O'Hare, 1997-12-15 Since the First International Conference on the Reduction of Drug Related Harm held in 1990 the term harm reduction has gained wide currency in the areas of public health and drug policy Previously the field was characterized by heated struggle between prohibition and legalization of addictive substances and this debate tended to obscure practical collective approaches Harm reduction an approach which encompasses various policy directives and program initiatives was inspired by the positive outcomes of such public measures as needle exchange programs for reduction of HIV risk methadone maintenance programs education on the risks of tobacco use and programs designed to limit alcohol consumption The essays in this book illustrate the scope and vigour of the emerging harm reduction model The essays drawn from seven international

conferences on harm reduction cover a wide variety of topics including public policy women and reproductive issues the experiences of special populations human rights defining and measuring harm and intervention Researchers and practitioners will benefit from the varied papers in the volume which combine insights into policy making and front line outreach efforts with comprehensive conceptual and empirical approaches Harm Reduction represents an important initiative in making academic work accessible and useful to a larger community and provides guidance for the development of effective policies and programs

Clinical Case Studies in the Behavioral Treatment of Alcoholism William M. Hay,Peter E. Nathan,2012-12-06 There is no shortage of books on

behavioral research on behavioral research on alcoholism or on behavioral research on alcoholism treatment Most of the authors of chapters in this book have been involved in the writing of these books The books and their authors have played an

important role in the dramatic increase in the influence of behavioral approaches to one of our society's most troubling human problems. There are not many books though which detail the longitudinal course of the behavioral therapies none doing so for behavior therapy with alcoholics and problem drinkers. That this book now appears then is a first made more valuable by the fact that the chapter's authors are both researchers and clinicians willing and able to combine respect for empirical data with clinical sensitivity and compassion, concern and commitment for their patients. The chapters in this book reveal important commonalities and telling divergencies in technique, strategy and treatment tactics. Despite a common perspective on etiology and treatment, the authors of the chapters in this book diverge in criteria for deciding on treatment goal, choice of initial intervention, target, the specifics of techniques used and follow up procedures. Common to all though is an openness to innovation, a pragmatic appreciation of approaches that work and a sincere respect for the patient and his or her fundamental desire for a healthy, happier and more productive life.
