Encyclopedia of Aging: Qualitative research-Yeast, index, 2002 Religious Influences on Health and Well-Being in the Elderly K. Warner Schaie, PhD, Neal Krause, PhD, Alan Booth, PhD, 2004-06-15 What makes the book's approach so captivating is that each chapter is written by a different researcher in the study of religion and health These researchers are responsible for significant portions of the existing literature and methodologies found in this field today The versatility of the book warrants special mention It is effective as a survey of work that has already been done on this topic At the same time it serves as a wellspring of ideas for new research This work makes a valuable contribution to the present understanding of research on religion and health It also serves as a road map to help chart directions for future endeavors in the field *Sociology of Religion* This volume focuses on the ways in which religious institutions religious practices and religious organizations impact the health and well being of older persons Topics examined include the conceptualization and measurement of religion in late life the relationship between religious coping and possible stress reduction the role of forgiveness as an alternate mediator how social class gender and race can influence the specific effect of religion and religious institutions in a diverse aging society Contributors include L Chatters K Ferraro L K George E Idler S McFadden and K Meador **Biblical Perspectives on Aging** J. Gordon Harris, 2013-04-03 As the population of older Americans grows meaningful perspectives on aging are needed by both the young and the old *Biblical Perspectives on Aging* God and the Elderly takes a detailed look at the views of aging presented in the Old and New Testaments This wide ranging and insightful survey encompasses not only the entire Bible but also interpretations of sacred Middle Eastern and Judaic documents This new expanded edition of the original classic text adds thorough discussions of the wisdom of the Bible and Jewish literature with ways to interpret these readings and what they teach about spirituality and growing older Approaches to aging issues have changed in recent years With the average American lifespan increasing the view of old age as a solitary time of waiting

has been pushed aside. So too has the assumption that the elderly simply want to remember the good old days. This updated edition of *Biblical Perspectives on Aging: God and the Elderly* has expanded its scope to incorporate and address the effects of these changing views. This sweeping study of the Bible's positive treatment of aging and elderly figures sheds new light on contemporary society's negative view of the elderly and what can be done about it. Clear examples from both Scripture and literature provide a wealth of understanding, comfort, and wisdom to everyone interested in aging and the Bible. In addition, this new edition explores the changing relationships that exist among aging, hermeneutics, mentoring, and spirituality. The new insights revealed here reinvigorate the challenge against ageism and traditional pictures of old age as a time of withdrawal and living in the past. Among the issues explored in *Biblical Perspectives on Aging: God and the Elderly* are aging experiences and the Bible, biblical theology and its role in social support for the elderly, hermeneutics and old age spirituality and its relationship to aging, cross-generational relationships and mentoring, and a detailed index of Old and New Testament Scripture references. Accessible and concise with compelling arguments and numerous examples, *Biblical Perspectives on Aging: God and the Elderly* is an ideal resource for pastors, seminary students, professionals, and leaders of programs for the elderly. It shows both young and old that while aging may not be easy, Biblical theology can ease some of its mystery.

Religion, Health, and Aging Harold G. Koenig, Mona Smiley, Jo Ann Ploch Gonzales, 1988-12-14. This book presents a comprehensive and scientific review of the research during the past fifty years on the relationship between religion and health in later life. It will help professionals gain awareness of the importance of religious and spiritual variables among older people. The widespread interest in religion among today's elderly suggests its value as a coping strategy and personal resource. Unlike any other in the field, this volume synthesizes both past research and new findings, including recent unpublished data, into a model of how religion might interact with other variables to help determine adaptation to stress in later life. *Religion, Health, and Aging* provides substantial contributions to both the applied and academic aspects of religion and aging. With over 500 references, this work brings together research findings from a wide variety of disciplines and organizes them in an easily retrievable format. The introduction provides a theoretical framework and model of interactions. Subsequent chapters address the relationship between religious beliefs and attitudes and both mental and physical health. Next investigated are the impacts on health of private religious activity, community religious involvement, and personal religious experience. A model that demonstrates how religion might interact with stress and illness in later life is presented. Actual cases exemplify the role of religion in the lives of older people facing life-threatening illness. Perspectives from the disciplines of social gerontology, geriatric medicine, and the clergy are analyzed. A review is presented of the implications of research findings for professionals working with older persons. A detailed bibliography list of publications and organizations to contact for further information provides access to further resources. The appendix contains a review of the development and validation of the Springfield Religiosity Schedule, an instrument measuring religious activities, attitudes, and beliefs of the

elderly Religion Health and Aging will serve as a centralized resource of significant value to gerontologists physicians in psychiatry and medicine nurses educators therapists clinical psychologists social workers the clergy and others whose professional and personal lives touch older people **Gerontology in Theological Education** Barbara P. Payne,1989

Gerontology in Theological Education provides a wealth of useful information to those interested in planning the introduction or improvement of gerontological materials in the curriculum of theological schools The need for including aging in the professional education of the clergy is clear yet it is a relatively unmet need In response to this general lack of gerontological training in theological education this landmark volume documents a model project planned and implemented at the Gerontology Center at Georgia State University and provides suggestions for its use elsewhere Administrators and faculty will find here the results of a national study of gerontology in theological education Detailed descriptions of eight innovative programs nationwide and an extensive bibliography will also provide guidance for administrators and faculty interested in locating materials that relate to their gerontological concerns
