Counter-Enlightenment Graeme Garrard,2012-02-01 Arguing that the question of Jean Jacques Rousseau's relationship to the Enlightenment has been eclipsed and seriously distorted by his association with the French Revolution Graeme Garrard presents the first book length case that shows Rousseau as the pivotal figure in the emergence of Counter Enlightenment thought Viewed in the context in which he actually lived and wrote from the middle of the eighteenth century to his death in 1778 it is apparent that Rousseau categorically rejected the Enlightenment republic of letters in favor of his own republic of virtue The philosophes placing faith in reason and natural human sociability and subjecting religion to systematic criticism and doubt naively minimized the deep tensions and complexities of collective life and the power disintegrative forces posed to social order Rousseau believed that the ever precarious social order could only be achieved artificially by manufacturing sentiments of sociability reshaping individuals to identify with common interests instead of their own selfish interests

The Passionate Society Lisa Hill,2006-01-13 Adam Ferguson 1723 1816 was a major figure of the Scottish Enlightenment whose thought was in many respects original and distinctive This book is a study of his ideas and of the intellectual forces that shaped them Though somewhat overlooked in the nineteenth century Ferguson was rescued from obscurity in the first half of the twentieth century by scholars interested in the origins of sociology and early critiques of modernity Ferguson's interest in the mechanics of social life and especially social change led him to many groundbreaking insights In fact he is sometimes identified as the Father of Modern Sociology In addition to exploring whether or not he

merits this title this study examines the whole of Ferguson's thought as a system and includes his moral and faculty psychology historiography theology politics and social science Ferguson is distinguished by his deep appreciation of the complexity of the human condition his study of society is based on the belief that it is not only reason but the unseen unplanned sub rational and visceral forces that keep the human universe in motion Ferguson's appreciation of this fact and his ability to make social science of it is his major achievement
