Routledge Encyclopedia of Narrative Theory David Herman, Manfred Jahn, Marie-Laure Ryan, 2010-06-10 The past several decades have seen an explosion of interest in narrative with this multifaceted object of inquiry becoming a central concern in a wide range of disciplinary fields and research contexts As accounts of what happened to particular people in particular circumstances and with specific consequences stories have come to be viewed as a basic human strategy for coming to terms with time process and change However the very predominance of narrative as a focus of interest across multiple disciplines makes it imperative for scholars teachers and students to have access to a comprehensive reference resource *Routledge Encyclopedia of Narrative Theory* David Herman, 2011 [Routledge Encyclopedia of Narrative Theory](#) David Herman, Manfred Jahn, Marie-Laure Ryan, 2011 **Routledge Encyclopedia of Narrative Theory** David Herman, Manfred Jahn, Marie-Laure Ryan, 2005 Arranged in an A Z format this is a comprehensive reference resource for scholars teachers and students of narrative theory *Narrative Theory* Kent Puckett, 2016-11-07 Kent Puckett s *Narrative Theory A Critical Introduction* provides an account of a methodology increasingly central to literary studies film studies history psychology and beyond In addition to introducing readers to some of the field s major figures and their ideas Puckett situates critical and philosophical approaches towards narrative within a longer intellectual history The book reveals one of narrative theory s founding claims that narratives need to be understood in terms of a formal relation between story and discourse between what they narrate and how they narrate it both as a necessary methodological distinction and as a problem characteristic of modern thought Puckett thus shows that narrative theory is not only a powerful descriptive system but also a complex and sometimes ironic form of critique *Narrative Theory* offers readers an introduction to the field s key figures methods and ideas and it also reveals that field as unexpectedly central to the history of ideas **Phantom Sentences** Robert S. Kawashima, Gilles Philippe, Thelma Sowley, 2008 Ann Banfield professor in the Department of English at the University of California Berkeley is best known for her groundbreaking contributions to narrative theory Working within the paradigm of generative linguistics she argued that the language of fiction is characterized by two unspeakable sentences i e sentences that do not properly occur in the spoken language the sentence of pure narration and the sentence of represented speech and thought style indirect libre or erlebte Rede More recently Banfield offered a major reconsideration of the novels of Virginia Woolf and modernism in light of the philosophy of knowledge developed by G E Moore and Bertrand Russell and appropriated by Roger Fry in his critical analyses of impressionism and post impressionism The essays gathered here pay tribute to Banfield by addressing those disciplines and topics most closely related to her work including narrative theory and pragmatics the philosophy of language and knowledge generative syntax meter and phonology and modernism *Narrative Factuality* Monika Fludernik, Marie-Laure Ryan, 2019-12-16 The study of narrative the object of the rapidly growing discipline of narratology has been traditionally concerned with the fictional narratives of literature such as novels or

short stories But narrative is a transdisciplinary and transmedial concept whose manifestations encompass both the fictional and the factual In this volume which provides a companion piece to Tobias Klauk and Tilmann Kppe s *Fiktionalit t Ein interdisziplin res Handbuch* the use of narrative to convey true and reliable information is systematically explored across media cultures and disciplines as well as in its narratological stylistic philosophical and rhetorical dimensions At a time when the notion of truth has come under attack it is imperative to reaffirm the commitment to facts of certain types of narrative and to examine critically the foundations of this commitment But because it takes a background for a figure to emerge clearly this book will also explore nonfactual types of narratives thereby providing insights into the nature of narrative fiction that could not be reached from the narrowly literary perspective of early narratology Unnatural Narratives - Unnatural Narratology Jan Alber, Rüdiger Heinze, 2011-09-29 In recent years the study of unnatural narratives has become an exciting new but still disparate research program in narrative theory For the first time this collection of essays presents and discusses the new analytical tools that have so far been developed on the basis of unnatural novels short stories and plays and extends these findings through analyses of testimonies comics graphic novels films and oral narratives Many narratives do not only mimetically reproduce the world as we know it but confront us with strange narrative worlds which rely on principles that have very little to do with the actual world around us The essays in this collection develop new narratological tools and modeling systems which are designed to capture the strangeness and extravagance of such anti realist narratives Taken together the essays offer a systematic investigation of anti mimetic techniques and strategies that relate to different narrative parameters different media and different periods within literary history Conceptualizing Cultural Hybridization Philipp Wolfgang Stockhammer, 2011-09-18 Within the context of globalization cultural transformations are increasingly analyzed as hybridization processes Hybridity itself however is often treated as a specifically post colonial phenomenon The contributors in this volume assume the historicity of transcultural flows and entanglements they consider the resulting transformative powers to be a basic feature of cultural change By juxtaposing different notions of hybridization and specific methodologies as they appear in the various disciplines this volume s design is transdisciplinary Each author presents a disciplinary concept of hybridization and shows how it operates in specific case studies The aim is to generate a transdisciplinary perception of hybridity that paves the way for a wider application of this crucial concept Turning Points Ansgar Nünning, Kai Marcel Sicks, 2012-10-30 At times of crisis and revolution such as ours diagnoses of crucial junctures and ruptures turning points in the continuous flow of history are more prevalent than ever Analysing literary cinematic and other narratives the volume seeks to understand the meanings conveyed by different concepts of turning points the alternative concepts to which they are opposed when used to explain historical change and those contexts in which they are unmasked as false and over simplifying constructions Literature and film in particular stress the importance of turning points as a sensemaking device as part of a character s or a community s cultural memory while at the same time unfolding the

constructive and hence relative character of turning points Offering complex reflections on the notion of turning points
literary and filmic narratives are thus of particular interest to the present volume
