Royal Dockyards:

History of Work and Labour Relations in the Royal Dockyards Ann Day, Kenneth Lunn, 2018-10-24 Focusing on the work and labour history of shipyard workers in the Royal Dockyards this text examines the question of state employment and the specific characteristics of that pattern of industrial relations It encompasses discussions of the nature of work and resistance to forms of authority Particular forms of control are available to the employer which are absent from the experience of the private sector In addition the state is often under pressure to act as a model employer and this can lead to tensions between this objective and the need for financial constraint and public surveillance of the uses of taxation *Chatham Dockyard, 1815-1865* Philip MacDougall, 2020-11-25 By the end of the Napoleonic Wars the seven home dockyards of the British Royal Navy employed a workforce of nearly 16 000 men and some women On account of their size dockyards add much to our understanding of developing social processes as they pioneered systems of recruitment training and supervision of large scale workforces From 1815 1865 the make up of those workforces changed with metal working skills replacing wood working skills as dockyards fully harnessed the use of steam and made the conversion from constructing ships of timber to those of iron The impact on industrial relations and on the environment of the yards was enormous Concentrating on the yard at Chatham the book examines how the day to day running of a major centre of industrial production changed during this period of transition The Admiralty decision to build at Chatham the Achilles the first iron ship to be constructed in a royal dockyard placed that yard at the forefront of technological change Had Chatham failed to complete the task satisfactorily the future of the royal dockyards might have been very different **The Royal Dockyards, 1690-1850** J. G. Coad, 1989 A Management Odyssey J. M. Haas, 1994 The Royal Dockyards were Britain s oldest state enterprise and biggest and most complex industrial unit This book shows how the Admiralty over two centuries struggled to master the intractable problems of organization and management which the dockyards presented Haas maintains that the dockyards portrayed an image of being inefficient high cost producers These problems were chiefly extreme centralization but paradoxically weak control inadequate coordination of departments and accounting procedures unreliable information about production costs and material an insufficiently educated and professionalized constructive corps and an underpaid and slack workforce Contents Preface Introduction The Eighteenth Century Running in Place Tinkering with the System 1793 1815 Lightening Ship 1815 1834 Winds of Change 1834 1854 Under Seige 1854 1868 Revolution and Counterrevolution 1868 1885 The Watershed 1885 1900 A New Century and New Ideas 1900 1914 Conclusion Notes Bibliography Index *Chatham Dockyard* Philip Macdougall, 2012-05-30 Founded in 1570 Chatham Dockyard quickly became one of the most important naval yards for the repair and building of warships maintaining a pre eminent position for the next 400 years Located on the River Medway in all the yard was responsible for the construction of over 500 warships these ranging from simple naval pinnaces through to first rates that fought at Trafalgar and concluding with the hunter killer submarines of the nuclear age In this detailed new

history of the yard from experienced local and maritime author Philip MacDougall particular attention is given to the final two hundred years of the yard s history the artisans and labourers who worked there and the changing methods used in the construction of some of the finest warships to enter naval service Coinciding with the dockyard s seeking status as a World Heritage site this fascinating history places Chatham firmly in its overall historical context The Royal Dockyards During the Revolutionary and Napoleonic Wars Roger Morriss,1983 **Factories and Plant** William Hornby,1958 Naval History 1680-1850 Richard Harding,2017-11-30 This collection of essays sets out to present a sample of the rich diversity of writings on naval history in this period The collection covers subjects ranging from strategy operations and tactics to administration technology and the maritime economy Within this volume the reader will be able to see essays that influenced the development of modern naval history through to samples of some of the latest research **Espionage and Secrecy (Routledge Revivals)** Rosamund Thomas,2016-06-10 This prize winning book first published in 1991 provides a detailed legal account of the development of the UK Official Secrets Acts 1911 1989 In particular the Espionage section s 1 of this criminal law is analysed carefully illustrated by leading cases of UK spies prosecuted under this section particularly during the 1980 s including MI5 officer Michael Bettaney and Geoffrey Prime who worked at GCHQ The author also examines problems of evidence in espionage prosecutions and the consent of the Attorney General in cases under the Official Secrets Acts This book remains the definitive treatise on the UK Official Secrets Acts especially concerning the espionage provisions Transactions of the Royal Institution of Naval Architects Royal Institution of Naval Architects,1905 List of members in each volume
