Denis Vincent, Mary Crumpler

Rspt Verbal Test 6 Pk10:

Specimen Denis Vincent, Mary Crumpler, 2002-10 Cognitive abilities underpin the ease and speed with which pupils can grasp new concepts and ideas across the curriculum. These Verbal Abilities Tests provide a reliable tool for assessing academic ability particularly in verbally based subjects and among pupils for whom English is the first language. As such they give an objective indicator of individual pupil potential which can help to establish appropriate teaching and learning expectations. The tests also help to identify underachievers and pupils needing learning support while allowing teachers to benchmark new intakes, review value added and evaluate school performance. The tests are especially useful for assessing groups of wide chronological age and ability making them ideal for quick screening and as a guide to grouping for teaching. Two overlapping tests cover ages 6-10 and 8-13 and can be used at any time during the school year; each test takes about 55 minutes to administer to a full class at a pace determined by the teacher. The presentation is non-threatening, allowing all pupils to engage with the varied range of question types. All items are objectively scored and norms derived from a UK wide standardisation sample of more than 14,000 pupils, given as standardised scores, quotients and percentiles. The parallel Nonverbal Abilities Tests are also available from H S.
