Rubbish The Archaeology Of Garbage:

Rubbish! William L. Rathje, Cullen Murphy, 2001 It is from the discards of former civilizations that archaeologists have reconstructed most of what we know about the past and it is through their examination of today's garbage that William Rathje and Cullen Murphy inform us of our present Rubbish is their witty and erudite investigation into all aspects of the phenomenon of garbage Rathje and Murphy show what the study of garbage tells us about a population's demographics and buying habits Along the way they dispel the common myths about our garbage crisis about fast food packaging and disposable diapers about biodegradable garbage and the acceleration of the average family's garbage output They also suggest methods for dealing with the garbage we do have **Rubbish!** William Rathje, Cullen Murphy, 1994-01-01

Unmaking Waste Sarah Newman, 2023-05-26 In *Unmaking Waste* Sarah Newman asks what happens when there are disagreements about what constitutes waste and what one should do with it both at singular moments in time for example when ideas about waste collide in emerging colonial contexts and across time such as between those who left things behind in the past and the archaeologists who recover them Newman examines ancient Mesoamerican understandings of waste Euro American perceptions of waste in New Spain and early modern European ideals of civility and Christian understandings of good and bad expressed metaphorically through cleanliness and filth These differing perceptions Newman argues demands that we rethink centuries of assumptions imposed on other places times and peoples so long as waste remains a category misunderstood to be common sensical and stable archaeological methods will prove unequal to their task Newman instead proposes anamorphic archaeology an approach that emphasizes the possibility that archaeological objects have multiple physical and conceptual lives *Archaeologies of waste* Daniel Sosna, Lenka Brunclíková, 2016-11-30 Waste represents a category of things which is familiar and ubiquitous but rarely reflected in archaeological and cultural studies Perception of waste changes over time and practices associated with waste vary The ambiguity of waste challenges traditional archaeological approaches that take advantage of refuse to infer past behavior Recent developments in research in the social sciences and humanities indicate that waste offers many more dimensions for exploration This interdisciplinary book brings together scholars who demonstrate the potential of research into waste for understanding humans non humans and their interrelations In 12 chapters the authors cover topics ranging from the relationship between waste and identity in early agricultural settlements to the perception of contemporary nuclear waste Although archaeological approaches dominate the contributions there are also chapters that represent the results of anthropological and historical research The book is structured into three main sections that explore the relationship between waste and three domains of interest value social differentiation and space *Archaeologies of Waste* will interest archaeologists anthropologists historians and other readers intrigued by the potential of things which were left behind to shed light on social life **Encyclopedia of Consumption and Waste** Carl A. Zimring, William L. Rathje, 2012-02-29 These volumes convey what daily life is like in the Middle East Asia

and Africa Entries will aid readers in understanding the importance of cultural sociology to appreciate the effects of cultural forces around the world

The Literature of Waste S. Morrison, 2015-06-03 Tracing material and metaphoric waste through the Western canon ranging from Beowulf to Samuel Beckett Susan Signe Morrison disrupts traditional perceptions of waste to better understand how we theorize manage and are implicated in what is discarded and seen as garbage Engaging a wide range of disciplines Morrison addresses how the materiality of waste has been sedimented into a variety of toxic metaphors If scholars can read waste as possessing dynamic agency how might that change the ethics of refuse ing and ostracizing wasted humans A major contribution to the growing field of Waste Studies this comparative and theoretically innovative book confronts the reader with the ethical urgency present in waste literature itself

Waste William Viney, 2014-05-22 Why are people so interested in what they and others throw away This book shows how this interest in what we discard is far from new it is integral to how we make build and describe our lived environment As this wide ranging new study reveals waste has been a polarizing topic for millennia and has been treated as a rich resource by artists writers philosophers and architects Drawing on the works of Giorgio Agamben T S Eliot Jacques Derrida Martin Heidegger James Joyce Bruno Latour and many others Waste A Philosophy of Things investigates the complexities of waste in sculpture literature and architecture It traces a new philosophy of things from the ancient to the modern and will be of interest to those working in cultural and literary studies archaeology architecture and continental philosophy
