

SELF-REGULATION

Self-regulation is the ability to control one's emotions and behavior. That can include being able to control our thoughts, impulses, and even instinctual drives.

OVERVIEW

Self-regulation is about the ability to control our thoughts and behaviors. When faced with a stressful situation, or one that could make us angry, some people are able to convert their initial reaction into a more constructive response. They can inhibit their impulse to react with the expression of strong emotion or engage in a negative action. This is what we refer to as a self-regulation response.

EXAMPLES

- **Daily Exercise:** Maintaining an exercise routine even on days you don't want to do it.
- **Regular Studying:** Studying at school or university even when you don't want to, to get top grades.
- **Going to Bed on Time:** Stopping what you're doing and getting into a settling routine to get to bed early, so you wake refreshed tomorrow.
