W. Beardsmore, 1969 Accounts of moral reasoning have tended either to ignore the differences in what men count as good reasons for their moral judgments or in emphasizing these differences to imply that anything whatsoever can count as a moral reason This book shows that both of these positions rest on a mistaken assumption and by rejecting this assumption brings out important features of moral discourse Although moral disagreement is seen to be far more radical than empirical disagreement a framework of agreement is shown to be a precondition of moral discourse and even of the possibility of individual moral decision Moral Reasoning Victor Grassian, 1981 Moral Reasoning Richard M. Moral Judgments as Educated Intuitions Hanno Sauer,2017-03-06 An argument that moral reasoning plays a crucial role in moral judgment through episodes of rational reflection that have established patterns for automatic judgment foundation Rationalists about the psychology of moral judgment argue that moral cognition has a rational foundation Recent challenges to this account based on findings in the empirical psychology of moral judgment contend that moral thinking has no rational basis In this book Hanno Sauer argues that moral reasoning does play a role in moral judgment but not as is commonly supposed because conscious reasoning produces moral judgments directly Moral reasoning figures in the acquisition formation maintenance and reflective correction of moral intuitions Sauer proposes that when we make moral judgments we draw on a stable repertoire of intuitions about what is morally acceptable which we have acquired over the course of our moral education episodes of rational reflection that have established patterns for automatic judgment foundation Moral judgments are

educated and rationally amenable moral intuitions Sauer engages extensively with the empirical evidence on the psychology of moral judgment and argues that it can be shown empirically that reasoning plays a crucial role in moral judgment He offers detailed counterarguments to the anti rationalist challenge the claim that reason and reasoning play no significant part in morality and moral judgment and the emotionist challenge the argument for the emotional basis of moral judgment Finally he uses Joshua Greene s Dual Process model of moral cognition to test the empirical viability and normative persuasiveness of his account of educated intuitions Sauer shows that moral judgments can be automatic emotional intuitive and rational at the same time
