Lubkemann, Christopher B. Steiner, 2010-05-17 The second edition of Perspectives on Africa A Reader in Culture History and Representation is both an introduction to the cultures of Africa and a history of the interpretations of those cultures Key essays explore the major issues and debates through a combination of classic articles and the newest research in the field Explores the dynamic processes by and through which scholars have described and understood African history and culture Includes selections from anthropologists historians philosophers and critics who collectively reveal the interpenetration of ideas and concepts within and across disciplines regions and historical periods Offers a combined focus on ethnography and theory giving students the means to link theory with data and perspective with practice Newly revised and updated edition of this popular text with 14 brand new chapters and two new sections Conflict and Violent Transformations and Development Governance and Globalization **View from the Traveller Site** Anna Hoare, 2025-04-24 Traveller specific architecture in Ireland and permanently temporary sites in the UK embody an insoluble contradiction as systems of control policing and strategic neglect and as a cultural right an alternative to housing that recognizes the dignity of choice View from the Traveller Site explores post nomadism as an artefact of statecraft in which contradictory processes occur in tandem legal insecurity persists and state policies have unexpected consequences as sites materialize the countervailing tendencies of post war European states At junctures of camps courtrooms sites and council houses Irish Travellers generate new architectures and revive old ones Architecture and the body form distributed fields of analogy and metaphor and are reciprocally constituted as social capacities and sites of personhood and relations Through ethnographic accounts of sites and camps funerary monuments and gift cycles of mares and foals the book reflects on material and performative architectures negotiations of gendered and generational rights and the role of women in encounters between the dead the living and the unborn in camps The author engages with debates in the anthropology of the state property citizenship and the family and offers a new analysis of Travellers concepts of personhood and embodiment as they negotiate the politics and poetics of citizenship kinship and sociality enfolding the settled non Traveller world of sites into the collective bodies of breeds and back breeds This exploration of the productivity of post nomadic architecture culture and sociality will be of particular interest to scholars of anthropology architecture and material and visual culture **The Wintu & Their Neighbors** Christopher K. Chase-Dunn, Kelly Marie Mann, 1998-10 On the cutting edge of world systems theory comes The Wintu and Their Neighbors the first case study to compare and contrast systematically an indigenous Native American society with the modern world at large Using an interdisciplinary approach that combines sociology anthropology political science geography and history Christopher Chase Dunn and Kelly M Mann have scoured the archaeological record of the

Wintu an aboriginal people without agriculture metallurgy or class structure who lived in the wooded valleys and hills of northern California By studying the household composition kinship and trade relations of the Wintu they call into question some of the basic assumptions of prior sociological theory and analysis Chase Dunn and Mann argue that Immanuel Wallerstein s world systems perspective originally applied only to the study of modern capitalistic societies can also be applied to the study of the social economic and political relationships in small stateless societies They contend that despite the fact that the Wintu appear on the surface to have been a household based society this indigenous group was in fact involved in a myriad of networks of interaction which resulted in intermarriage and which extended for many miles around the region These networks which were not based on the economic dominance of one society over another a concept fundamental to Wallerstein s world systems theory led to the eventual expansion of the Wintu as a cultural group Thus despite the fact that the Wintu did not behave like a modern society lacking wealth accumulation class distinctions and cultural dominance Chase Dunn and Mann insist that the Wintu were involved in a world system and argue therefore that the concept of the minisystem should be discarded They urge other scholars to employ this comparative world systems perspective in their research on stateless societies
