**Communication in Healthcare Settings** Alison Pilnick, Jon Hindmarsh, Virginia Teas

Gill, 2010-03-19 This book presents an international snapshot of communication in healthcare settings and examines how policies, procedures and technological developments influence day to day practice. Brings together a series of papers describing features of healthcare interaction in settings in Australasia, the U S A, continental Europe and the UK. Contains original research data from previously understudied settings including professions allied to medicine, telephone mediated interactions and secondary care. Contributors draw on the established conversation analytic literature on healthcare interaction and broaden its scope by applying it to professionals other than doctors in primary care. Examines how issues relating to policy, procedure or technology are negotiated and managed throughout daily healthcare practice. *Developing Healthcare Skills through Simulation* Matthew Aldridge, Stephen Wanless, 2012-03-22 This book provides an essential resource for educators of clinical skills who want to utilise simulation based education to provide optimal learning opportunities for their students. Andrew Bland, University of Huddersfield. In this book a team of experienced authors have put together a much needed text that takes an evidence based practical approach to skills development. Lauren Mawson, University of Cumbria. A really exciting new text. Sarah Burden, Leeds Metropolitan University. Practice educators and mentors are now expected to have the skills and techniques needed to implement a learning skills through simulation programme into established curricula yet using simulation to teach, while of huge importance, requires careful and time consuming planning. This valuable resource takes away some of that burden by providing clear, ready made activities and guidance from leading practitioners in a range of fields which healthcare and practice educators and mentors can use to enhance their teaching of all the essential and commonly taught clinical and management skills and knowledge. Dedicated chapters which all follow a defined step by step format provide simulation scenarios alongside facilitator guidance which will help develop confidence in the teaching of key skills such as Drug administration, Conflict management, Infection control, Breaking bad news, Catheter and bowel care. These scenarios and accompanying guidance can be used as a framework for teaching, promoting a greater understanding of the skill being taught and providing a risk free opportunity for the student to practice their clinical and managerial skills and judgement. **Skills for Midwifery Practice E-Book** Ruth Bowen, Wendy Taylor, 2016-01-11 Now with a new design the ever popular Skills for Midwifery Practice continues to provide the ideal level of instruction and guidance for a wide range of clinical skills, each one of which is presented in a unique template format to help make learning easy. Step by step guidance is given on a range of topics including abdominal examination, taking of maternal and neonatal vital signs, infection control, mother and baby hygiene, elimination and drug administration. Childbearing and intrapartum skills are also extensively covered as are neonatal assessment and nutrition, principles of phlebotomy and intravenous therapy, moving and handling, wound management and CPR. Skills for Midwifery Practice is invaluable to midwives in training, qualified midwives returning to practice as well as other members of the obstetric

healthcare team Presents over 150 essential midwifery procedures in an easy to read quick reference format Learning Objectives and end of chapter self assessment exercises allow readers to monitor their progress Refers to the latest evidence and research including current national and international guidelines Explains the underlying physiology associated with pregnancy and childbirth Over 150 artworks help explain physiological processes and clinical procedures Roles and Responsibilities boxes define the nature and extent of current practice Ideal for use as a basis for teaching and assessment New format now with colour makes learning even easier Explores the use and significance of the Modified Early Obstetric Warning Scoring Chart Discusses advances in equipment usage including the application of sequential compression devices temporal artery thermometers and pulse oximetry in the early detection of critical congenital heart disease Contains advances in microbiology and infection control including the application and removal of gloves and the use of ANTT for each relevant procedure Physiology updates include an expanded section on normal and abnormal breathing patterns the structure of the stratum corneum at birth and the factors that affect its barrier function and neonatal reflexes present at birth Updated information regarding the use of the automated external defibrillator during maternal resuscitation and the use of blended air and oxygen and pulse oximetry during neonatal resuscitation Care of the traumatised perineum including expanded discussion of modern suture materials Recognition and management of complications associated with infusion therapy and epidural analgesia

**Clinical Skills in Children's Nursing** Imelda Coyne, Fiona Timmins, Freda Neill, 2010-04-29 Designed as a compelling text for students Clinical Skills in Children's Nursing offers evidence based and family centred practical guidance for procedures in all care settings Emphasis is placed on the development of decision making skills and sensitive care It is enhanced by illustrations online resources and regular updates to evidence **ECGBL**
