**Nursing as Therapy** Richard McMahon, Alan Pearson, 2013-11-11 Over the past 20 years nursing has begun to rediscover some of its basic truths which have become obscured because of the rise in technology and medical knowledge this century One of these basic truths is the concern of this book that intelligent sensitive nursing does make a difference to the consumers of health care Like most essential truths this seems almost too obvious to be stated Nevertheless many nurses have become increasingly aware of a commonly held view that getting better or staying healthy is largely dependent upon the intervention of or monitoring by medical practitioners and paramedical therapists together with the technology they use and that nurses merely carry out the orders of such workers and keep things in order An apt analogy frequently used is that of the air journey The point of the journey is to get from A to B and is largely dependent upon the aeroplane i.e. the technology in health care and the crew in the cockpit i.e.

**Family Therapy** Imelda W. Clements, 1982 *The Nurse as Therapist* Philip J. Barker, Douglas Fraser, 2025-09-17 This book originally published in 1985 is intended to complement Philip Barker's previous book Behaviour Therapy Nursing The latter focussed more on the principles of the behavioural approach to nursing while this book adopts a more practical approach It is also shown that the proposed model can be extended beyond psychiatric and learning disabilities into general nursing In the first part of the book the range of settings in which various therapeutic approaches can be used is set out including work in the community Emphasis is also given to the nurse's role in social skills training and in the development of everyday living skills for the rehabilitation of the mentally ill and disabled The second part of the book presents case studies each describing how the nurse assesses the patient and plans and implements the treatment The

emphasis is on practical illustration of the behavioural approach to different clinical problems in different patient populations in various treatment settings At the end of each study there is discussion of possible alternative treatment strategies and the general applicability of the case
