**Cumulated Index Medicus**, 1996      **Nursing in Prison** Joanne Brooke, 2023-07-19. This textbook addresses a gap in the market as currently there are no contemporary books exploring nursing within a prison setting. The main focus is the provision of healthcare in the Prison Service of England and Wales, although examples will also be drawn from the United States of America and Australia. Healthcare within prison settings has changed remarkably to address the needs of the changing prison populations. Thus this text is clearly structured to support student nurses to understand the role of the nurse within prison and how the different specialities of nursing are applied in this unique setting. This textbook provides an overview of the context of prison prisoners and healthcare as well as the experiences of nurse specialists who work in this field, including adult mental health and learning disability nurses across primary care, mental health services, substance misuse and end of life care. This volume is informative for both undergraduate student nurses and for qualified nurses and dispels many myths regarding working as a nurse in a prison. Each chapter is written by experts within the field, including nurses who have worked or still working within the prison setting. An important objective of this work is to inform student nurses of the possibility and opportunity of a nursing career within a prison setting. *Health Care Provision* Audrey Leathard, 2000. Examines health care in England and Wales from 1900 to the year 2000. Scotland and Northern Ireland are reviewed separately. Discusses the implication of Britain's involvement with the European Union and health care systems abroad. The key NHS reforms are charted across time and the changes brought about under New Labour are reviewed.
