Teaching for Toleration in Pluralist Liberal Democracies

Betto van Waarden (KU Leuven)

Abstract

This article determines which education enables the perpetuation of diverse ways of life and the liberal democracy that accommodates this diversity. Liberals like John Rawls, Stephen Macedo, and William Galston have disagreed about the scope of civic education. Based on an analysis of toleration—the primary means for maintaining a pluralist liberal democracy—I argue that schools should teach democratic participatory skills and a minimal exposure to diversity to enable citizens to participate in the democratic process of defining which cultural and religious practices the state should tolerate or prohibit through its laws. To make this argument, I contend, in contrast to several scholars, that toleration is practiced primarily between the democratic state and citizens rather than among citizens. Although many theorists do not show the educational implications of their theories, I conclude that schools must teach: (a) mutual respect among citizens, (b) citizens' constitutional rights, (c) democratic participatory skills, (d) a basic understanding of other worldviews, and (e) critical media skills. Students should master these components through instruction on government, cultures and religions, and the media, but more important through discussions and democratic simulations both inside and outside the classroom.

THIS ARTICLE AIMS to determine which kind of education enables the perpetuation of a reasonable diversity of ways of life and a form of liberal democracy that accommodates this diversity. If there is insufficient civic education, citizens may lose the ability to coexist peacefully. However, if civic education is too extensive, it may forcefully liberalize and destroy reasonable life modes¹—including their cultural values and morality that some argue liberal democracy depends on (see Galston, 1991, p. 9; Walker, 1994, pp. 4–21).

1. *Reasonable life mode* is based on Rawls's concept of "reasonable comprehensive doctrine" (2005, p. 59). However, I prefer *reasonable life mode*, as it encompasses not only doctrines, religions, and cultures but also their related practices, which can cause division and the need for (legal) accommodation of diversity.

Commitment, Character, and Citizenship Hanan A. Alexander, Ayman K. Agbaria, 2012-05-31 As liberal democracies include increasingly diverse and multifaceted populations the longstanding debate about the role of the state in religious education and the place of religion in public life seems imperative now more than ever The maintenance of religious schools and the planning of religious education curricula raise a profound challenge Too much state supervision can be conceived as interference in religious freedom and as a confinement of the right to cultural liberty Too little supervision can be seen as neglecting the development of the liberal values required to live and work in a democratic society and as abandoning those who within their communities wish to attain a more rigorous education
