Arne Hallam,2016-11-02 Nutrition Economics Principles and Policy Applications establishes the core criteria for consideration as new policies and regulations are developed including application based principles that ensure practical effective implementation of policy From the economic contribution of nutrition on quality of life to the costs of malnutrition on society from both an individual and governmental level this book guides the reader through the factors that can determine the success or failure of a nutrition policy Written by an expert in policy development and incorporating an encompassing view of the factors that impact nutrition from an economic standpoint and their resulting effects this book is unique in its focus on guiding other professionals and those in advanced stages of study to important considerations for correct policy modeling and evaluation As creating policy without a comprehensive understanding of the relevant contributing factors that lead to failure is not an option this book provides a timely reference Connects the direct and indirect impacts of economic policy on nutritional status Provides practical insights into the analysis of nutrition policies and programs that will produce meaningful results Presents a hands on approach on how to apply economic theory to the design of nutritional policies and programs *The Russia-Ukraine conflict and global food security* Glauber, Joseph W.,Laborde Debucquet, David,2023-07-10 When Russia invaded Ukraine in February 2022 sparking fears of a global food crisis IFPRI responded rapidly to the need for information and policy advice to address the crisis From the first moments of the conflict a new IFPRI blog series provided critical information and insights into the impacts on food security caused by rising food fertilizer and fuel prices and trade disruptions for vulnerable countries and regions This book is a compilation of those blog posts which include analysis of trade flows tracking of food prices and policy responses and results of impact modeling Together they provide an overview of how the crisis has progressed how the international community and individual countries responded with efforts to ensure food security and what we are learning about the best ways to ensure food security in the aftermath of a major shock to global food systems **Freedom from Want** George Kent,2005-06-02 There is literally a world of difference between the statements Everyone should have adequate food and Everyone has the right to adequate food In George Kent s view the lofty rhetoric of the first statement will not be fulfilled until we take the second

statement seriously Kent sees hunger as a deeply political problem Too many people do not have adequate control over local resources and cannot create the circumstances that would allow them to do meaningful productive work and provide for themselves The human right to an adequate livelihood including the human right to adequate food needs to be implemented worldwide in a systematic way Freedom from Want makes it clear that feeding people will not solve the problem of hunger for feeding programs can only be a short term treatment of a symptom not a cure The real solution lies in empowering the poor Governments in particular must ensure that their people face enabling conditions that allow citizens to provide for themselves In a wider sense Kent brings an understanding of human rights as a universal system applicable to all nations on a global scale If as Kent argues everyone has a human right to adequate food it follows that those who can empower the poor have a duty to see that right implemented and the obligation to be held morally and legally accountable for seeing that that right is realized for everyone everywhere

Nutrition Policy Implementation Nevin S. Scrimshaw,Mitchel B. Wallerstein,2012-12-06 The MIT International Nutrition Planning Program INP was initiated in the fall of 1972 with a grant from the Rockefeller Foundation later supplemented by funds from USAID under the 2110 Program Con ceived as a multidisciplinary undertaking the INP was a joint effort of the Department of Nutrition and Food Science and the Center for Inter national Studies at MIT that also included representatives of the Depart ments of Economics Political Science Urban Studies Humanities Anthropology and Civil Engineering It has

been successful in attracting graduate students and conducting research on various international food and nutrition problems including the design of intervention programs. A condition of the original grant from the Rockefeller Foundation was the organization of a meeting to summarize and evaluate the progress of the program. It was ultimately decided that the best approach would be a workshop that would attempt to assess what had been learned about the implementation of food and nutrition policies since the start of the INP. Out of concern for food and nutrition policy issues, the World Hunger Programme of The United Nations University (UNU) and the Ford Foundation also agreed to cosponsor the workshop.

Demographic Change and Long-Run Development Matteo Cervellati, Uwe Sunde, 2017-10-27. Recent approaches to economic demography investigating the effect of the transition to low mortality and low fertility on economic development. Over the last two hundred years, mortality and fertility levels in the Western world have dropped to unprecedented levels. This demographic transition was accompanied by an economic transition that led to widespread education and economic growth after centuries of near stagnation. At the same time, other changes have occurred in family structures, culture, and the organization of society.

Economists have only recently begun to take into account the demographic transition from high mortality and high fertility when modeling and researching economic development This CESifo volume reviews recent approaches to economic demography considering such topics as the bio geographic origins of comparative development differences the role of health improvements and mortality decline as well as physiological familial cultural and social aspects After an overview of the study of demography and economic demography the chapters cover subjects including the Neolithic era and the period of the formation of states and social institutions longevity and economic growth household decision making and fertility land inequality education and marriage in nineteenth century Prussia and caste systems and technology in pre modern societies The book concludes with a call for further investigation of the institutional and social factors that influence demographics and economies suggesting that unified growth theory offers a potential approach to studying development Contributors Matteo Cervellati Francesco Cinnirella David de la Croix Carl Johann Dalgaard Matthias Doepke Elena Esposito Davide Fiaschi Tamara Fioroni Oded Galor Boris Gershman Erik Hornung Fabian Kindermann Nils Petter Lagerl f Holger Strulik Uwe Sunde David N Weil

Cost-Benefit Analysis of the African Risk Capacity Facility Daniel J. Clarke,Ruth Vargas Hill,2013-11-01 Governments play a key role in supporting populations affected by natural disasters including rebuilding infrastructure to ensure continued services and scaling up public safety nets to prevent widespread hunger and poverty However the

traditional approach of limiting greater spending to the aftermath of a disaster has many drawbacks External support from bilateral or multilateral donors can be slow and unreliable Private sector reinsurance can be prohibitively expensive And reallocating budgets toward recovery and reconstruction is typically a slow process that can even hurt long term development by drawing resources away from effective programs Some countries are trying to mitigate this liability by banding together and creating sovereign catastrophe risk pools that allow governments to coordinate with one another to insure their uncertain fiscal liabilities at lower cost Countries contribute to the pool which then provides payments if an insured natural disaster strikes The African Risk Capacity ARC has been proposed as a pan Africa drought risk pool to insure against drought risk in Africa south of the Sahara If fully operationalized the ARC will mark a major change in how donors fund emergency support to countries in Africa during times of need In this paper we undertake a cost benefit analysis of the ARC pool and discuss how lessons can inform the design of the ARC
