

Nutrition for Infancy

- Since children of this age group are dependent on others, special attention should be paid to their diet.
- For five to six months after the baby is born, mother's milk supply him/her necessary nutrients.
- When baby reaches six or seven months, mother's milk is not enough for him/her. Therefore other supplementary food should be arranged.

Psychology of Childhood is a systematic account of research on the psychological aspects of nutrition in children from birth to adolescence. It deals with two major themes: the development of eating and the effects of malnutrition on the developing child. Robert Drewett discusses the developmental problems that arise with eating and food intake, including nursing and weaning in infancy, the handling of solids, and the development of food choice and eating habits. Nutritional problems are considered in children born preterm or small for gestational age, or whose growth is poor, in children who are iron deficient, or more generally malnourished, and in children with physical illnesses including phenylketonuria and cerebral palsy. The development of eating disorders and obesity are also considered. Drawing on research from both developing and industrialised countries, this book will be of interest to students, researchers, and professionals in psychology, nutrition, and child health.

The Great Ormond Street Hospital Manual of Children's Nursing Practices Susan

Macqueen, Elizabeth Bruce, Faith Gibson, 2012-06-18. Clinical skills are a fundamental aspect of nursing care of children and young people. The Great Ormond Street Hospital Manual of Children's Nursing Practices is an evidence-based manual of practical skills in children's nursing which builds on the extensive expertise developed at Great Ormond Street Hospital. It encompasses all aspects of children's nursing, from the most basic aspects of everyday practice to advanced practice in high dependency and intensive care, to provide a comprehensive resource for all qualified nurses, students, and other health care professionals involved in caring for children both in the hospital and the community setting. Children's and young people's nursing presents unique challenges. The Great Ormond Street Hospital Manual utilises the latest clinical research and expert clinical knowledge to address these challenges and provides the underlying theory and evidence for nursing care of children. It provides a definitive guide to clinical skills, procedures in children's and young people's nursing, which enables nurses working with children and young people to practice confidently and deliver clinically effective, family-centred care. Key features: Offers access to clinical procedures developed through the extensive expertise from Great Ormond Street Hospital. Contains evidence-based recommendations for expert care. Encompasses all aspects of children's care. Contains procedures, guidelines, students can rely on and effectively use in practice following qualification. Highlights specific needs of neonates and adolescents. Placed in the context of inter-disciplinary care of the child. Includes the rationale for each procedure, the why, as well as how. Information presented in a similar way to The Royal Marsden Manual of Clinical Nursing Procedures, offering continuity to those working in both adult and paediatric settings.
