Sensory Science Applications for Food Production Mehra, Rahul, Pandey, Arun Kumar, Guiné, Raquel P.F., 2024-07-17. Despite the critical role of sensory science in ensuring food quality and safety, there needs to be more comprehensive educational resources that cover the breadth and depth of this field. Current literature often focuses on isolated aspects, leaving scholars and practitioners needing a unified reference for understanding the complex interplay of sensory organs, evaluation techniques, and technological advancements. This gap hinders the development of skilled sensory panelists and restricts innovation in food product development and quality control. **Sensory Science Applications for Food Production** bridges this gap by offering a comprehensive and cohesive overview of sensory science. Through its meticulously crafted chapters, the book thoroughly explores sensory organs including Gustation, Olfaction, Vision, Sense of touch, and Auditory Perception. It elucidates the mechanisms behind sensory perception, examines abnormalities, and discusses factors influencing perception, all crucial for training proficient sensory panelists. The book also delves into advanced sensory evaluation techniques, including their application in developing innovative food products, addressing the need for up to date knowledge in the field.
