## **Nutritional Therapy Featuring The Core Program For Diet Revision:**

**Nutritional Therapy Featuring the Core Program for Diet Revision** Stephen Gislason, 1991 *Digestive Disorders*  
Stephen Gislason MD, 2016-05-19 The book *Digestive Disorders* is dedicated to the intelligent reader who wants to understand and manage his or her digestive tract disorder. The book covers a range of problems from milder but unpleasant symptoms that recur over many years to serious life threatening diseases. The book is available in printed and eBook editions and interfaces with the Alpha Nutrition Program a standard method of diet revision. From the Introduction There are at least 100 million people in the USA and Canada that have recurrent long term gastrointestinal symptoms. Abdominal pain, distension with excess gas, constipation and diarrhea are the four prominent symptoms. Most members of this large group will self medicate and suffer long term. Some will receive the diagnosis of irritable bowel syndrome along with inappropriate advice and medication with limited efficacy. Some will emerge from this large symptomatic group with well defined disease. The rest of the symptomatic population will remain by default sufferers of the irritable bowel syndrome. Most members of this symptomatic group will have other dysfunction associated with and probably caused by their digestive problems. Crohn's disease, Celiac disease and Ulcerative Colitis are three of the more serious diagnoses. These digestive tract diseases are immune mediated with increased permeability of the digestive tract and are associated with a long list of whole body immune mediated diseases. Patients with these conditions are often symptomatic for many years before the diagnosis is made. The main difference between Celiac and Crohn's disease is that celiac patients are told to change their diet and improve when they remove gluten from their diet. Crohn's patients are not told to change their diet and often follow a deteriorating path of chronic disease with episodic crises that require surgery, prolonged hospitalization and permanent disability. We believe these conditions are related in terms of disease causing mechanisms and recommend that all groups of patients follow a similar protocol of diet revision. The main difference is that acute inflammation of the bowel wall in a Crohn's patient can be dangerous and requires a food holiday sometimes for several weeks. Food is replaced by Alpha ENF with optional additional nutrients.

*Aching & Fatigue* Stephen Gislason, 2017-07-24 The book *Aching Fatigue* is about non specific illnesses and two common patterns of illness: the Chronic Fatigue Syndrome and Fibromyalgia. Some patients say "I feel sick all over." These are overlapping symptom complexes and are often part of a larger illness complex. The general classification is non specific hypersensitivity disease. Dr Gislason explains why diet revision as the first and most essential form of therapy. Long term management of food intake is required to sustain improvements. The book *Aching Fatigue* describes these common problems and their solution providing case history examples. Chronic Fatigue Syndrome, CFS, Fibromyalgia and related disorders are not discrete diseases in the usual sense but patterns of maladaptive responses to food and the environment. We believe that chronic fatigue syndrome and Fibromyalgia are symptom complexes and are often caused by delayed pattern food allergy. Both conditions tend to co exist and both are part of a larger illness complex. The general classification is non specific.

hypersensitivity disease Chronic fatigue and fibromyalgia and should be treated with diet revision as the first and most essential form of therapy Long term and precise management of food intake is required to sustain improvements Alpha Nutrition Program Stephen Gislason MD,2017-07-14 The Alpha Nutrition Program was designed to resolve common food related diseases The book addresses a wide range of medical problems such as diabetes 2 arterial disease high blood pressure digestive disorders skin disorders fatigue arthritis weight loss and other common problems associated with food People who feel sick all over or who suffer from chronic fatigue and chronic pain often improve on the program Weight management is covered in a new and intelligent way Common digestive problems are addressed Several common health problems in children are resolved The central feature of the Alpha Nutrition Program is diet revision Dr Stephen Gislason invented diet revision therapy in 1983 His method of diet revision has been tested by thousands of people The program is designed as self help and provides sufficiently detailed instructions that you can conduct your own diet revision therapy The Alpha Nutrition Program is presented in three sections Section 1 provides you with an understanding of how the Alpha Nutrition Program works You then consider where you come from your attitudes beliefs lifestyle and then you proceed to understand the stages of transformation as you pursue diet revision The discussion of symptoms will help you to monitor yourself your children and other family members Single people couples and entire families do the program Usually one person acts as the leader and supplies the main energy and direction for change The program works well for children mother is more often the leader when one child in the family needs help and mother may need to involve the entire family to help one child A separate chapter describes guiding children through the program The Alpha Program food choices are explained Section 2 is the program food instructions The program has three phases and each is explained in its own chapter The food list and instructions for each phase are defined first Predictions about changes are then described with problem solving instructions Three tracks through the program are described The goals are clearly defined for each phase and you are given instructions about what foods you should eat what to expect how to problem solve and how to use nutritional tools such as the nutrient formulas Alpha ENF and Alpha DMX Section 3 explains meal planning and nutrition and provides additional information about topics of major concern The Alpha Nutrition Book of Cooking is a companion volume to the Alpha Nutrition Program This text provides practical knowledge helpful in understanding how to prepare foods and create recipes that are suitable for recovery from a variety of health problems **Williams' Essentials of Nutrition and Diet Therapy - Revised Reprint - E-Book** Eleanor Schlenker,Sara Long Roth,2013-03-15 Evidence Based Practice boxes emphasize the importance of using research to achieve the best possible patient outcomes Expanded health promotion coverage includes the World Health Organization s definition of health the concept of wellness and patient education An in depth discussion of childhood obesity explores the impact and prevention of this major health concern Additional information on metabolic syndrome examines its effects on the cardiovascular system Coverage of nutrition support includes the use of adapted feeding tools to
