Clark-Kazak, 2022-02-15 Legal precarity mobility and the criminalization of migrants complicate the study of forced migration and exile Traditional methodologies can obscure both the agency of displaced people and hierarchies of power between researchers and research participants This project critically assesses the ways in which knowledge is co created and reproduced through narratives in spaces of displacement advancing a creative collective and interdisciplinary approach Documenting Displacement explores the ethics and methods of research in diverse forced migration contexts and proposes new ways of thinking about and documenting displacement Each chapter delves into specific ethical and methodological challenges with particular attention to unequal power relations in the co creation of knowledge questions about representation and ownership and the adaptation of methodological approaches to contexts of mobility Contributors reflect honestly on what has worked and what has not providing useful points of discussion for future research by both established and emerging researchers Innovative in its use of arts based methods Documenting Displacement invites researchers to explore new avenues guided not only by the procedural ethics imposed by academic institutions but also by a relational ethics that more fully considers the position of the researcher and the interests of those who have been displaced **So What? Now What? The Anthropology of Consciousness Responds to a World in Crisis** Matthew C. Bronson, Tina R. Fields, 2009-05-05 The greatest crisis of our times in a failure of the human imagination Editors The world is currently undergoing a period of unprecedented crises on virtually every front economic ecological and humanitarian It is starkly apparent that a shift is needed in our dominant structural systems and that by addressing the collective thinking that has created and maintained these systems scholars can do their part to catalyze such a shift The interdisciplinary field known as the Anthropology of Consciousness offers important insights for enacting this necessary shift This book draws on the work of a group of diverse scholars to explore what the intersection of anthropology and consciousness studies can contribute to the public turn within anthropology and the academy in general Its twelve chapters span disparate geographies and disciplinary frameworks yet cohere in their focus on common themes such as imagination empathy agency dialogue and ethics The answers to the question So What Now What differ for a linguistic anthropologist in

Gani, Raymond Hinnebusch, 2022-03-17 This volume covers the middle time period of the Syrian uprising roughly from 2012 when Syria s peaceful protest began to mutate into a violent insurgency and civil war until roughly 2018 when the conflict took on features of a frozen conflict The middle period was important as one of key junctures or turning points when the struggle could have reached rather different outcomes Non violent protest failed to drive democratization and turned into violent insurrection but revolution from below also failed as did regime counter insurgency leaving protracted civil war the default outcome Second the consequences of civil war became evident with six themes failing statehood coexisted with regime resilience rebel governance emerged as a viable challenge to the regime social forces were sharply polarized external actors exacerbated internal divisions a predatory war economy emerged and intense violence led to massive displacement of the population Taking an innovative and interdisciplinary approach that seeks to capture the full complexity of the phenomenon this book contributes significantly to our understanding of the Syrian conflict therefore it will be of interest to academics students journalists and policy makers interested in the Syrian civil war
