Gods and Kings Dana Thomas, 2015-02-10 More than two decades ago John Galliano and Alexander McQueen arrived on the fashions scene when the business was in an artistic and economic rut Both wanted to revolutionize fashion in a way no one had in decades They shook the establishment out of its bourgeois minimalist stupor with daring sexy designs They turned

out landmark collections in mesmerizing theatrical shows that retailers and critics still gush about and designers continue to reference Their approach to fashion was wildly different Galliano began as an illustrator McQueen as a Savile Row tailor Galliano led the way with his sensual bias cut gowns and his voluptuous hourglass tailoring which he presented in romantic storybook like settings McQueen though nearly ten years younger than Galliano was a brilliant technician and a visionary artist who brought a new reality to fashion as well as an otherworldly beauty For his first official collection at the tender age of twenty three McQueen did what few in fashion ever achieve he invented a new silhouette the Bumster They had similar backgrounds sensitive shy gay men raised in tough London neighborhoods their love of fashion nurtured by their doting mothers Both struggled to get their businesses off the ground despite early critical success But by 1997 each had landed a job as creative director for couture houses owned by French tycoon Bernard Arnault chairman of LVMH Galliano s and McQueen s work for Dior and Givenchy and beyond not only influenced fashion their distinct styles were also reflected across the media landscape With their help luxury fashion evolved from a clutch of small family owned businesses into a 280 billion a year global corporate industry Executives pushed the designers to meet increasingly rapid deadlines For both Galliano and McQueen the pace was unsustainable In 2010 McQueen took his own life three weeks before his womens wear show The same week that Galliano was fired Forbes named Arnault the fourth richest man in the world Two months later Kate Middleton wore a McQueen wedding gown instantly making the house the world s most famous fashion brand and the Metropolitan Museum of Art opened a wildly successful McQueen retrospective cosponsored by the corporate owners of the McQueen brand The corporations had won and the artists had lost In her groundbreaking work Gods and Kings acclaimed journalist Dana Thomas tells the true story of McQueen and Galliano In so doing she reveals the revolution in high fashion in the last two decades and the price it demanded of the very ones who saved it **Walker Evans** Judith Keller,1995-11-02

Digital Image Analysis Walter Kropatsch, Horst Bischof, 2006-05-10. The human visual system as a functional unit including the eyes, the nervous system, and the corresponding parts of the brain certainly ranks among the most important means of human information processing. The efficiency of the biological systems is beyond the capabilities of today's technical systems, even with the fastest available computer systems. However, there are areas of application where digital image analysis systems produce acceptable results. Systems in these areas solve very specialized tasks; they operate in a limited environment and high speed is often not necessary. Several factors determine the economical application of technical vision systems: cost, speed, exhibility, robustness, functionality, and integration with other system components. Many of the recent developments in digital image processing and pattern recognition show some of the required achievements. Computer vision enhances the capabilities of computer systems in autonomously collecting large amounts of data, in extracting relevant information, in perceiving its environment, and in automatic or semiautomatic operation in this environment. The development of computer systems in general shows a steadily increasing need in computational power, which comes with decreasing hardware costs.
