Analysis and Risk of Nanomaterials in Environmental and Food Samples Damia Barcelo, Marinella Farre, 2012-08-20 The application of nanotechnology in different consumer products has delivered

new products with highly desirable properties but at same time has opened a new window for a wide group of emerging contaminants and a new type of human exposure which needs to be assessed Most of the current human toxicological information on nanomaterials comes from nano sized particles in air and their effects via inhalation Other routes of human exposure such as water and food and the effects on human health and the environment have been less studied It is the recent research in these areas that is highlighted here in one of the first books covering the analysis and ecotoxicological evaluation of nanomaterials in food and the environment with both matrices being of considerable interest In addition to providing a global summary of recent research this book shows how widely used chromatographic and spectroscopic methods can be added to the analytical arsenal of microscopic techniques that have commonly been used to characterize nanomaterials Describes the analytical techniques used to characterize nanomaterials and their applications in environmental or food samples Includes analysis and ecotoxicological evaluation of nanomaterials in food and environmental matrices Takes a detailed look at the research on emerging fields of human exposure to nanomaterials and their environmental risks Risk and Public Policy in East Asia Mutsuko Takahashi,2016-04-08 Contemporary Asian society is marked by social processes associated with the loss of stable economic growth and high employment family structures capable of caring for family members in need and governmental economic and political competence Post financial crisis job uncertainty and income and labor market polarization have become important issue in Asian societies Family structures are viewed as have been weakened with a corresponding rise in divorce and domestic violence Trust in the government is in decline Against this backdrop it is timely to review three critical issues 1 policies addressing work related risks and socio economic security 2 changes regarding the structure and stability of families and 3 issues concerning governance in times of weakened state capacity declining trust and the emergence of new politics Containing chapters written by international scholars this book introduces the concepts and theoretical approaches of risk and risk and governance and places them within the context of Asian societies **Risks and Legal Theory** Jenny Steele,2004-04 This book explores the conceptual place of risk across a number of fields of law Gendered Risks Kelly Hannah-Moffat,Pat O'Malley,2007-11-13 This international collection of edited interdisciplinary papers analyzes what is currently known about gendered risks and identifies some new directions and challenges for research and theory *Ethnographies of Neoliberalism* Carol J. Greenhouse,2012-02-25 Since 2008 the global economic crisis has exposed and deepened the tensions between austerity and social security not just as competing paradigms of recovery but also as fundamentally different visions of governmental and personal responsibility In this sense the core premise of neoliberalism the dominant approach to government around the world since the 1980s may by now have reached a certain political limit Based on the premise that markets are more efficient than government neoliberal reforms were pushed by powerful national and transnational organizations as conditions of investment lending and trade often in the name of freedom In the same spirit governments increasingly turned to the private sector for what were formerly state

functions While it has become a commonplace to observe that neoliberalism refashioned citizenship around consumption the essays in this volume demonstrate the incompleteness of that image as the social limits of neoliberalism are inherent in its very practice Ethnographies of Neoliberalism collects original ethnographic case studies of the effects of neoliberal reform on the conditions of social participation such as new understandings of community family and gender roles the commodification of learning new forms of protest against corporate power and the restructuring of local political institutions Carol J Greenhouse has brought together scholars in anthropology communications education English music political science religion and sociology to focus on the emergent conditions of political agency under neoliberal regimes This is the first volume to address the effects of neoliberal reform on people's self understandings as social and political actors The essayists consider both the positive and negative unintended results of neoliberal reform and the theoretical contradictions within neoliberalism as illuminated by circumstances on the ground in Africa Europe South America Japan Russia and the United States With an emphasis on the value of ethnographic methods for understanding neoliberalism's effects around the world in our own times Ethnographies of Neoliberalism uncovers how people realize for themselves the limits of the market and act accordingly from their own understandings of partnership and solidarity
