indigenous healing in a culture fighting to preserve its spiritual health A firsthand account of a little known healing tradition A dramatic story of self transformation by a well respected Harvard educated anthropologist In the late 1970s Richard Katz a clinical psychologist trained in anthropology spent two years living in a remote island community in Fiji hoping to record the practices of its healers At the foundation of their healing he discovered was the concept of the straight path a journey through life whose truth is revealed only to the extent that it is searched for with honesty and faith It is a way of healing that in its very essence is a way of living a path that emphasizes the spiritual dimensions of health and the relevance of these to the community But while interviewing healers at work Katz was drawn into an increasingly suspenseful drama Unexplained deaths rumors and suspicions and the intrusion of a zealous evangelist rocked the village and soon revealed to the author the dangerous alternative to the straight path the misuse of power that some call witchcraft *The Straight Path of the Spirit* is an engrossing story of indigenous healers and a dramatic account of cultures in collision Through the story of his own self transformation Katz reveals not only those aspects of life essential for the Fijians as they struggle to hold onto their identity but also what is of importance to all of us who seek to retain our humanity      **Summary of Letty Cottin Pogrebin's**

**Shanda** Everest Media,2022-10-07T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 When it came to cancer I was prepared for the worst And the worst was here In the produce department of all places The first mistake Taking my neurologist s call on my cell phone At Whole Foods In the produce department The doctor quickly explained that the most likely cause of the growth was a sarcoma a type of tumor that originates in muscle tissue which is why my symptoms had been so nonspecific and my scans so inconclusive But he also said It s very rare for a tumor to grow this large in muscle without causing any pain or other symptoms I nodded and repeated his words back to him as if they were my own It s very rare for a tumor to grow this large in muscle without causing any pain or other symptoms The most common type of brain tumor is a glioma which is a tumor that originates in the brain s nerve cells They are very rare

and usually cause no symptoms But they can grow very large without causing any pain or other symptoms 2 I had a brain tumor which was removed It was benign but it left me blind in one eye and I have double vision 3 The most important thing about a tumor is where it is located 4 I was prepared for the worst when it came to cancer and the worst was here
